CC-ZFX100

Zalman FX100 fan-less CPU cooler

Product Overview

Zalman FX100 fan-less CPU cooler: 10x heat pipes with MPJ (Multiple heatpipe Pressing Joints) Hexahedron structured heatsink, 9635cm² heat dissipation area, support optional 92mm fan; include ZM-STG2M super thermal grease - for AMD AMx/FMx, LGA775/ 1155/ 1156/ 1366/ 2011 Intel CPU

Specifications

Features:

High Performance Fanless Cooler
With Zalman`s innovative technology, the FX100 is designed to utilize natural convection where the heatsink passively transfers the heat to the surrounding. The hot air is then exhausted out of the chassis with the help of chassis fans. And, due to its passive and efficient operation, several factors that contribute shorter life span in electronics (such as vibration, dust, and heat) have minimal impact, which makes the FX100 one of the most durable CPU cooler out in the market.

High Durability
The FX100 is the perfect cooling solution at places where noise, dust, and vibration can be detrimental to the system and its surrounding areas.

Hexahedron Heatsink
Hexahedron structure offers maximum heat dissipation area with minimal space.

10 High Performance Heatpipes
Optimized heat transfer performance with 10 heatpipes applying MPJ(Multiple-heatpipe Pressing Joints) technology.

Black-pearl nickel plated heatsink
Corrosion-resistance reinforced with high quality finishing touch.

Wide Compatibility
Fits in ATX mid tower case (Width 180mm) and compatible with most CPU sockets.

Mirroring base
Provides outstanding heat transfer performance.

ZM-STG2M provided
High performance ZM-STG2 helps to maximize the heat transfer from CPU to CNPS9900DF base allowing optimal cooling performance.

Specifications:

Heatsink	
Dimension	156(L) x 156(W) x 157(H)mm
Weight	770g
Material	Pure Copper and Aluminum
heatpipe	10ea
Noise Level	0 dBA
Thermal Grease (ZM-STG2M)	
Capacity	1g
Temp. Range	-40 degreesC ~ 150 degreesC (-40degreesF~ 302degreesF)
