Overview

The Special Edition White Graphite Series 600T is a sleek, streamlined case designed to bring full tower functionality to the mid tower market. With a new windowed or mesh side panel (both included), four 5.25" bays, six hard drive bays with full SSD compatibility, an innovative cable routing system, and fantastic cooling from dual 200mm white LED fans, the Graphite Series 600T is the stylish and easy way to building the ultimate gaming PC.

Description

The Corsair Graphite Series 600T White Edition combines premium styling with advanced airflow design for users building high performance desktop systems. Its spacious mid tower layout supports ATX motherboards and provides clean internal cable management with a black interior finish that enhances component presentation.

This chassis includes both a windowed side panel and a meshed side panel, giving users the flexibility to prioritize aesthetics or maximum airflow depending on their build requirements. The large 200mm white LED fans provide efficient cooling with lower noise levels, while the integrated fan speed control knob allows easy adjustment without additional software.

The bottom mounted PSU layout helps improve internal airflow and cable routing while reducing heat buildup around critical components. Multiple drive bays allow installation of storage devices for gaming libraries, media storage, or workstation applications. Front connectivity includes USB 3.0, USB 2.0, IEEE1394, and audio ports for convenient peripheral access.

With support for additional cooling fans and enthusiast grade hardware, the Corsair 600T White Edition remains a popular choice for gamers, creators, and PC builders seeking reliable airflow performance and a premium chassis design.

Building a Great-Looking, High Performance System Has Never Been Easier

The Graphite Series 600T makes it easy to build a world-class gaming system. With excellent cooling from the dual 200mm fans, eight PCIe expansion slots to accommodate multiple graphics cards, and plenty of room for large, power-hungry components, the Graphite Series 600T can handle just about anything you can throw at it.

Mid-Tower Size, Full-Tower Features:

The Graphite Series 600T is a mid-tower in height, but inside it's positively cavernous. Easily accommodate even the longest graphics cards in the industry due to the reconfigurable hard drive bays. The increased space behind the motherboard tray allows clean, uncluttered cable routing. Up to six hard drive caddies, each of which can accommodate SSDs and standard mechanical disks, sit below the four 5.25" tool-free optical drive bays. If that weren't enough, you can remove the top panel 200mm fan and install a 240mm radiator and dual 120mm fans for a quick watercooling upgrade.

Features for System Builders:

Corsair innovated cable routing with the Obsidian Series(TM) cases, and the Graphite Series features the same ingenious design. Pre-cut holes in the motherboard tray with rubber grommets and plenty of room behind the motherboard to route cables for a clean, uncluttered interior. The optical drive bays are tool-free, the side panels easily detach with the built-in latch mechanisms, and the integrated fan controller allows you to choose between quiet operation or maximum cooling performance.

About Graphite Series PC Cases
