Features:

New Generation of Chassis

We are thinking innovatively to improve the traditional heavy chassis. Alice not only possesses a lighter frame, but maintains the durable and sturdy standard that we've set for ourselves!

Diversifying the Market

We've heard from the community, and the desire for a variety of vivid colors are in demand. To those that are bold enough to be different, let's make pastel colors, intricate designs or something totally distinct!

That's Cool!

Through a unique ascending design, the internal airflow transfers into an excellent unobstructed cooling airflow path that protects and extends the life of the system.

Vertical Computer Chassis

The vertical layout of Alice makes cable connectivity a breeze. The layout also allows heat to escape much easier and quicker with less obstructions present.

The Mad Hatter

Dust makes builders mad as a hatter! The accumulation of dust may cause too many problems. The cover is important to combat the dust and keep your system running smoothly.

Strong, Firm and Silent

Four shock-proof stands are strategically placed on corners to effectively reduce vibrations, and also to provide balance for a stable base.

Assemble with Ease!
