Specifications

Overview:

The design concept for D-Frame 2.0 originates from the freedom, individuality and impulsive nature of off-road motorcycles. The combination of steel tubing, anti-flip foot pads with deep tire treads, a power supply in the shape of an air-cooled engine and tempered glass is perfect fusion of art and technology.

Features:

Handcrafted Metallic Tubing Structure
Expertly bent tubing is entirely crafted by human hands. TIG (Tungsten Inert Gas) welding is used to reinforced stability, and unique electrode position, which creates an ultra-smooth finish! The motherboard mounting tray is sandblasted to achieve a refined metallic texture.

Innovative Two-Way Open Design with Quick-Release Fasteners
The outer frame features a unique two-way open design. With its quick-release fasteners, D-Frame 2.0 allows for easier assembling and custom display platforms.

Open-Frame Structure with Excellent Thermal Solutions
Open-frame structure improves heat dissipation and airflow is effectively channeled, ensuring excellent ventilated performance.

Highly Expandable for Superb Performance
Supports the latest high-end graphics cards, CPU heatsink and motherboards E-ATX (12"x13").

USB 3.1 Type-C Ultra-High-Speed Transmission

Advanced USB 3.1 Type-C interface provides up to 10Gbps transmission speed*, greatly reducing data transmission time. Dual-side slot also increases convenience.

SIII-1065W Transparent Power Supply

Each D-Frame 2.0 includes a SIII-1065W power supply, which is exclusively designed for D-Frame 2.0
