COU-700M

Cougar 700M Laser Gaming Mouse USB

Product Overview

Cougar 700M Laser Gaming Mouse USB, 12000 Dpi, 8 Programmable Button, 512KB On-board memory, Aluminum / Plastic, OMRON gaming switch, LED backlight 16.8 million colors, 150 IPS Maximum tracking speed, 30G Maximum acceleration, Golden-plated USB plug, 1.8m Braided Cable

Specifications

Overview:

The Ultimate Customizable - Aluminum Framing Gaming Mouse

Award-winning gaming mouse for professional gamers with customizable aluminum frame and weight adjustment. You can choose different palm rests and weights to suit your gaming style.

Features:

When Precision Met Speed State of the Art ADNS-9800 Laser Sensor

8200 DPI: Pinpoint control, no upper cap on your abilities. Configure up to four different DPI levels and fine-tune your precision and speed.

32-bit ARM Processor

700M has a little computer onboard and can do sophisticated computing fast and directly by itself- without relying on the gamer's computer and without the need for software drivers.

1000HZ Polling Rate / 1MS RESPONSE TIME

125Hz - 1000Hz USB rate fine-tuning

Seriously Durable

An aluminum structure serves as the skeleton of the COUGAR 700M, providing it with a unique

combination of lightweight structure and metal durability that sets it apart from ordinary mice.

1. Aluminum Framing Structure Components are built on a folded aluminum chassis to provide lighter (only 110g min.), more rigid and robust manipulative feelings
2. OMRON Switches 5 Million Clicks Guaranteed
3. Golden-plated USB Connector and Braided Cable Optimal Durability and Connectivity

8 Fully Configurable Buttons (including Fire and 45 degrees Sniper)

The COUGAR 700M's 8 fully configurable buttons allow the user, with the three on-board profiles, to access up to 27 functions with a single hand.

The 45 degrees Sniper Button allows the user to access a high accuracy mode without affecting the mouse's position,

thanks to its inclination. The Fire button puts an extra function in the point which minimizes the space traveled by the index finger.

Both of them maximize the efficiency of the user in terms of functions accessed/time spent.

1. DPI Adjustment
2. Mouse Wheel
3. Right Switch
4. Left Switch
5. Fire Button The unique combination of the COUGAR 700M's Fire Button and its 45 degrees Sniper Button optimize the user's performance during gameplay.
6. 45 degrees Sniper Button The COUGAR 700M's Sniper Button's 45 degrees Inclination allows the user to press it without moving the mouse. In other mice, the kinetic energy from pressing the button alters the mouse's original position.
7. Forward Switch
8. Backward Switch

COUGAR UIX Device Management System + Internal Memory Configure a myriad functions intuitively and bring them with you.

Set the functionality of all the buttons, assign pictures to profiles for graphical recognition, store macros and share them, all with a very convenient and intuitive interface. The 700M's internal memory will then allow to bring up to 3 full configuration profiles anywhere you go.

Ultimate Toolless Adaptability Patented Palm Rest Height Adjustment

700M's unique patented design allows the user to adjust the palm rest height to better adapt the mouse to any grip style.

Weight adjustment

Adapt the mouse's weight to your preferences and gaming style: by modifying the number of weights inserted in a special compartment, 700M will weight as much as you want it to.

Palm Rest Switch

Choose between two different palm rests with different shape and size to suit your gaming style.
