Corsair Type 5 PSU 90 degrees 12V-2x6 style a cable

Product Overview

Corsair Type 5 PSU 90 degrees 12V-2x6 style a cable, Ultra-flexible

Specifications

Overview Summary:

The Corsair Type 5 PSU 90degrees 12V-2x6 Style A Cable provides a direct and reliable power connection for compatible modern graphics cards. Its ultra-flexible design and right-angle connector help simplify cable routing where space is limited.

Ideal for PC builders in South Africa looking for cleaner GPU cable management and a secure connection. Check compatibility with your Corsair Type 5 PSU, then buy now and shop now for your next PC upgrade.

Performance tier: Premium

Uses:GPU power connections, gaming PCs, high-performance PC builds, compact PC cases, cable management

Overview:

The Corsair Type 5 PSU 90 Degree 12V-2x6 Style A Cable is designed to provide a clean, secure and flexible power connection for modern graphics cards. Its 90 degree angled connector is particularly useful in compact PC builds where there is limited space around the GPU power socket.

With ultra-flexible insulation and a right-angle design, this Corsair GPU power cable makes cable routing easier while helping reduce unnecessary bending near the graphics card. It provides a direct and reliable connection, with optimal contact across the power pins for improved safety and efficiency compared with using adapters.

Description:

The Corsair Type 5 PSU 90 Degree 12V-2x6 Style A Cable is an ultra-flexible GPU power cable designed for compatible Corsair power supplies and modern graphics cards using a 12V-2x6 style connection. The angled design allows the cable to sit neatly above or below the graphics card, making it easier to manage cables in tight spaces.

The flexible embossed insulation allows the cable to bend more easily during installation without compromising the connection. This makes it a practical choice for gaming PCs, high-performance workstations and builds where clean cable management and reliable GPU power delivery are important.

Features:

12V-2x6 90 Degree GPU Power Connection
The 90 degree connector is designed to make GPU power connections easier when there is limited clearance between the graphics card and the side panel of the PC case. By directing the cable away from the GPU socket, it can help create a cleaner installation and simplify cable management.

The cable can be routed according to the layout of your system, with options for positioning the connection above or below the graphics card depending on the card and case configuration.

Ultra-Flexible Cable Design
The ultra-flexible construction makes the cable easier to route through a modern PC chassis. This is especially useful in systems where a conventional straight GPU power cable would require a tight bend or create unwanted pressure around the graphics card connector.

The embossed insulation adds flexibility while maintaining a durable cable construction suitable for demanding PC environments.

Reliable Power for Modern Graphics Cards
The Corsair 12V-2x6 GPU power cable is designed to provide reliable power for compatible high-performance graphics cards. Its direct connection helps maintain optimal contact with each pin, supporting safe and efficient power delivery without relying on additional adapters.

Key points include:

- 12V-2x6 90 degree angled GPU power cable
- Ultra-flexible embossed insulation
- Designed for compatible Corsair Type 5 PSU connections
- Helps simplify GPU cable routing in tight spaces
- Supports cleaner cable management
- Designed for reliable contact across the power pins
- Suitable for compatible NVIDIA Founders Edition and third-party graphics cards

Designed for Easier PC Cable Management
A right-angle GPU power cable can make a noticeable difference when building or upgrading a gaming PC. The angled

connection helps keep the cable closer to the intended routing path, which can make it easier to achieve a neat installation while working around the limited space found in many modern PC cases.

The cable is available in configurations intended for different GPU layouts, allowing users to choose the appropriate angle and routing arrangement for their graphics card.

Corsair Type 5 PSU Cable
This cable is identified by part number / SKU CP-8920349, making it easier to match the product with your purchasing records or PC build requirements. Before installation, ensure that your Corsair power supply and graphics card are compatible with the Type 5 and 12V-2x6 connection standard.

For users building a high-performance gaming PC, upgrading a graphics card or improving internal cable management, this ultra-flexible Corsair GPU power cable provides a practical solution for creating a secure and tidy power connection.
