Product Specification Sheet

# CPS-RMCARD303

CyberPower OLS Network Power Management RM Cards

## Specifications

**Features:**

- Snmp mib provided
- Quick installation and user friendly interface
- User upgradeable firmware via ftp
- Security management provided
- Better deployment with powerpanel business edition software
- Support envirosensor to monitor temperature and humidity
- Md5 security management

The cyberpower network management card allows for remote monitoring and control of a ups attached to a network. After installing the hardware and configuring an ip address, the user can access, monitor, and control the ups from anywhere in the world! Simply use a web browser such as internet explorer or firefox to access your ups.

Servers and workstations can be protected by the ups utilizing the powerpanel business edition client version to gracefully shutdown when signaled by the network management card.

**System requirements**
A computer with a windows or linux operating system (for optional powerpanel business edition client)
An ethernet connection to an existing network
Nms (network management station) compliant with snmp (for optional nms management)

**Compatibility**
Smart app online series
