Corsair XTM60 high performance Thermal Paste - 3 grams

Product Overview

Corsair XTM60 high Performance Thermal Paste - 3 grams, non-conductive Thermal Interface material for CPU or GPU cooling, exceptional heat transfer capability compared to comparable alternatives, proven efficient in both Air and Liquid cooling applications, safe non-corrosive Formula for Component protection, includes tim spreader for quick and clean Application,

Specifications

Overview Summary:

Enhance your system's thermal performance with the Corsair XTM60 High-Performance Thermal Paste, now available for purchase in South Africa. This premium 3-gram compound is engineered to deliver exceptional heat transfer between your CPU or GPU and cooling solutions, ensuring significantly lower operating temperatures compared to standard alternatives.

Designed for both air and liquid cooling setups, the XTM60 features a safe, non-conductive, and non-corrosive formula that protects your valuable components while maximizing efficiency. With an included TIM spreader for quick and clean application, achieving superior cooling has never been easier. Secure your copy today to upgrade your build's stability and speed.

Performance tier: High

Uses:CPU cooling, GPU thermal management, liquid cooling systems, air cooling upgrades, PC building maintenance

Overview:

Elevate your PC's thermal performance with the CORSAIR XTM60, a premium non-conductive thermal paste engineered for enthusiasts and professionals alike. Designed to bridge the gap between high-end processors or graphics cards and their cooling solutions, this compound delivers exceptional heat transfer efficiency that significantly lowers operating temperatures compared to standard alternatives. Whether you are running an air-cooled rig or pushing the limits with liquid cooling, XTM60 is rigorously tested to ensure reliable thermal conductivity that keeps your hardware cool under heavy loads.

The formula is specifically crafted to be safe for all components, boasting a non-corrosive and electrically non-conductive profile that eliminates the risk of short circuits during application. To simplify the process even further, every unit comes with a dedicated TIM spreader tool, ensuring you can achieve a perfectly even layer without mess or missed spots, making high-performance cooling accessible to users of all skill levels.

Description:

The CORSAIR XTM60 thermal paste (Part Number CT-9010015-WW) is your ultimate solution for superior heat dissipation in demanding computing environments. This 3-gram high-performance compound offers unmatched thermal conductivity while remaining completely safe for sensitive electronics due to its non-conductive and non-corrosive properties. The package includes a specialized spreader tool that streamlines the application process, ensuring an even distribution for maximum efficiency. It is the ideal choice for both air and liquid cooling setups where maintaining low temperatures is critical for peak system stability.

Features:

Key Performance Benefits
Users upgrading or building new systems will find that this thermal compound provides a distinct advantage in temperature management. The advanced formula ensures rapid heat transfer from the processor to the cooler, preventing throttling and extending the lifespan of your components through consistent cooling efficiency.

- Exceptional thermal conductivity for lower CPU and GPU temperatures
- Non-conductive and non-corrosive formula protects sensitive electronics
- Proven reliability in both air and liquid cooling configurations
- Included TIM spreader ensures clean, even application every time

Technical Specifications:

Understanding the physical attributes of this product helps ensure compatibility with your workspace and storage needs. The compact packaging is designed for ease of handling while maintaining the integrity of the paste within.

- Total Product Length: 110 mm
- Total Product Width: 14 mm
- Total Product Height: 22.5 mm
- Net Weight: 0.021 kg
- Paste Quantity: 3 grams

What's in the box
When you order this item, you receive everything needed to start improving your cooling solution immediately. The package contains the CORSAIR XTM60 high-performance thermal paste and a dedicated TIM spreader tool designed for precise application.

FAQ

Is the CORSAIR XTM60 thermal paste safe for my CPU and GPU?
The formula is non-conductive, non-corrosive, and thoroughly tested to be safe for your components in both air and liquid cooling applications.

How much thermal paste is included with this product?
This package contains 3 grams of high-performance thermal paste designed for superior heat transfer between your processor or graphics card and cooler.

Does the kit include tools to help with application?

Yes, an included TIM spreader makes applying XTM60 a quick and clean job so you can ensure full coverage without missing spots.
