DISDUMMY

Microworld DisplayPort dummy plug

Product Overview

Microworld DisplayPort dummy plug, Up to 4K 3840x2160 Resolution can be simulated

Specifications

Overview Summary:

The Microworld DisplayPort Dummy Plug allows users to simulate a 4K display (3840x2160) without the need for an actual monitor. It's ideal for remote desktop sessions, headless PC setups, and GPU testing. This compact device ensures your graphics card operates at full resolution, preventing low-resolution black screen issues. With its plug-and-play design, it requires no drivers and consumes minimal power, making it convenient for both professional and home environments. Buy now to enhance your remote computing experience.

Performance tier: Entry-level

Uses: Remote desktop access, headless PC setups, GPU testing, virtual display emulation, cryptocurrency mining

Overview:

Microworld DisplayPort Dummy Plug for High-Resolution Simulation
The Microworld DisplayPort Dummy Plug allows users to simulate monitor connections with resolutions up to 4K (3840 x 2160), making it an ideal solution for remote desktop use, graphics card testing, or multi-display setups. This compact device ensures your computer operates at full resolution without the need for a physical monitor.

Description:

This DisplayPort dummy plug provides seamless display simulation with high-resolution support. Users can enjoy a reliable and cost-effective way to emulate a connected monitor, maintain normal graphics card operation, and test various display setups. Its plug-and-play design requires no drivers, consumes minimal power, and produces no heat, making it convenient for both professional and home environments.

Features:

High-Resolution Display Simulation

- Supports up to 4K resolution (3840 x 2160)
- Default recommended resolution: 1920 x 1080 @ 60Hz
- Prevents low-resolution black screen issues during remote sessions

Enhanced Remote and Graphics Performance

- Ensures graphics card operates normally with standard heat dissipation
- Ideal for remote desktop control or headless PC setups
- Enables testing of graphics cards and display configurations without a monitor

Compact, Efficient, and Easy to Use

- Small size and low power consumption
- No heat generation, suitable for continuous use
- Plug-and-play design with hot swap support
- Driver-free installation

Durable Design

- Made from sturdy metal for long-lasting use
- Compatible with all color systems: Grey

Package Includes

- 1 x DisplayPort Dummy Plug
