Specifications

Overview:

24-inch USB-C Docking Monitor with 100W Power Delivery
MODEL NUMBER:DM4240PUSZ

The 24-inch USB-C Docking Monitor with 100W Power Delivery seamlessly incorporates an ultra-compatible Targus docking station into a 24" LCD display to create a clutter-free workspace. Equipped with high-resolution graphics and multiple ports, this docking display is made for productive professionals and offers compatibility with most laptop brands.

No need to fuss with messy wires and extra gadgets, you save valuable desktop real estate with the display's built-in speakers, two microphones, and a 2M Pixel webcam. Plug other essential workspace peripherals like your favorite mouse, keyboard, or external hard drive into one of its 2 USB-A 3.2 Gen 1 ports. Top that off with 100W power delivery and a comfortable viewing design, and the DM4240PUSZ is the ultimate dock to keep you connected, powered, and productive.

With fully adjustable height and screen angles, you'll be able to work your display in portrait or landscape mode with full 360 degrees screen rotation while enjoying clear, crisp colors in 1080p HD and 178 degrees wide angle viewing. Maximize your workspace experience by adding a secondary display (DM4240SUSZ sold separately), designed specifically for this docking monitor, for uninterrupted streaming across multiple screens. Plus, you'll only need one adapter to power the primary docking monitor, the secondary monitor, and your laptop. For ultimate comfort, try an Antimicrobial Blue Light Filter Screen Protector or a 4Vu Privacy Screen made to fit your 24-inch monitor (screens sold separately).

Features:

Efficient Dual Display Setup
Extend your laptop for ultimate workspace efficiency - Ultra compatible docking station and monitor in one, plus a seamless connection with secondary display (DM4240SUSZ sold separately) without additional external power supply.

A Clutter-Free and Productive Workspace
No need to put a damper on productivity with the distraction of wires and a messy desk. Instead, plug all the devices you need directly into the monitor. With 2 USB-A 3.2 Gen 1 ports, an ethernet port and audio in/out port, it's simple to add the latest keyboard, external drives, or other peripherals to customize the workspace experience. Plus, it has a built-in webcam, speakers, and 2 microphones.

Innovative and Comfortable Design
With fully adjustable height and screen angles, the comfort design of this docking monitor is the ideal addition for your display needs. Seeing your work in portrait or landscape mode, plus full 360 degrees screen rotation, helps you enjoy clear, crisp colors in 1080p HD with 178 degrees wide angle viewing. For maximum comfort, try adding an Antimicrobial Blue Light Filter Screen Protector or a 4Vu Privacy Screen made to fit your 24-inch monitor (sold separately).

Multi-Platform Compatibility
Unlike proprietary docking solutions that lock users into a specific platform, brand, or even model of laptop, the ultra-compatibility of the Targus docking station works with multiple platforms and operating systems. That compatibility helps eliminate the need to replace it at every laptop refresh, which translates to lower cost of ownership for higher productivity over a longer time.
