

DS-K7P07

Hikvision Touchless Exit Button

Product Overview

Hikvision Touchless Exit Button, DS-K7P07, DC 12-24V Power Supply, Stainless Steel material, NO/NC/COM Output contact, Hollow Door Frame suitable Door

Specifications

Overview Summary:

The Hikvision DS-K7P07 is a touchless exit button designed for convenient and hygienic door access control. Its stainless steel panel, LED status indicator and NO/NC/COM output make it suitable for concealed installation with hollow door frames. Buy now for a practical access control solution in South Africa.

With DC 12-24 V power support and a compact 115 x 70 x 16 mm design, the DS-K7P07 is suitable for a range of controlled door applications. Shop now to add reliable touchless exit functionality to your access control system.

Performance tier:Mid-range

Uses:access control, touchless door exit, secure door release, concealed door installation, commercial and residential access systems

Overview:

Hikvision DS-K7P07 Touchless Exit Button for Access Control

The Hikvision DS-K7P07 is a touchless exit button designed for access control systems where convenient, hygienic door release is required. Its stainless steel panel provides a durable finish for regular use, while the touch-free activation allows users to open a connected door without physically pressing a button. The unit supports both NO and NC output contacts and operates from a DC 12-24V power supply, making it suitable for a range of access control installations.

Description:

The Hikvision DS-K7P07 touchless exit button provides a practical solution for releasing access-controlled doors without physical contact. It is designed for use with hollow door frames and can be integrated into compatible access control systems using its NO, NC and COM output contacts.

ComX Computers

Product Specification Sheet

A built-in LED status indicator provides a clear visual indication of the button's operating state. The green or blue LED indicates working or standby status, helping users quickly identify the condition of the device.

The stainless steel construction gives the DS-K7P07 a clean, professional appearance while providing a robust surface for everyday commercial and residential access control applications.

Features:

Touchless Door Exit Control

The touchless design makes the DS-K7P07 suitable for locations where hands-free door release is preferred. Users can activate the exit function without needing to press a physical button, making it a convenient choice for offices, commercial buildings, access-controlled entrances and other installations.

The device can be connected to compatible access control equipment using the available relay contact outputs:

- NO/NC/COM output contact
- DC 12-24V power supply
- Touchless activation
- Green/blue LED status indication
- Stainless steel panel
- Suitable for hollow door frames

Compact Stainless Steel Design

With dimensions of 115 x 70 x 16 mm, the Hikvision DS-K7P07 has a compact form that can be incorporated into a variety of door access installations. The stainless steel panel is well suited to environments where a durable and professional-looking exit control device is required.

LED Status Indicator

The integrated LED indicator helps provide immediate visual feedback. Green or blue illumination indicates the device's working or standby condition, making the button easier to identify and operate in everyday use.

Power and Door Integration

The DS-K7P07 supports a DC 12-24V power supply and provides NO, NC and COM contacts for connection to compatible access control equipment. This allows the touchless exit button to be incorporated into suitable electronic door release and access control systems.

For easy identification when ordering or configuring an access control installation, the product part number / SKU is DS-K7P07.

Dimensions

- Dimensions (L x W x H): 115 x 70 x 16 mm
- Imperial dimensions: 4.53 x 2.76 x 0.63 inches
- Material: Stainless steel
- Installation suitability: Hollow door frame

Suitable Applications

The Hikvision DS-K7P07 can be used for touchless exit control in offices, commercial buildings, controlled-access areas and other locations where a hands-free door release method is required. Its compact design, LED indication and flexible contact outputs make it a practical addition to compatible access control systems.
