Performance tier: Standard

Uses: Retail POS systems, cash drawer USB conversion, SK-410 cash drawer, CK-420 cash drawer, direct computer cash drawer management

Overview:

Maken Interface Conversion from RJ11 Printer Kick to USB, Compatible with SK-410 and CK-420 Cash Drawer

The Cash Drawer Trigger DT-100U (RJ11 to USB) enables seamless USB connectivity for your cash drawer. Traditionally connected to a POS printer or cash register, the cash drawer can now be linked directly to a computer via a USB port. This solution is ideal for POS systems that do not use a printer, providing a flexible and convenient way to manage cash drawer operations.

Description:

The DT-100U converts a standard RJ11 cash drawer interface to USB, allowing direct computer control. Each module comes

with a Virtual Serial Port Driver, making it appear as a standard RS232 Serial Port to your POS software. This ensures compatibility with existing software, with each module assigned a unique serial number and automatic serial port allocation for multiple devices. Users can enjoy plug-and-play setup without external power or complex configuration, streamlining cash management at any point of sale.

Features:

Direct USB Connection for Cash Drawers
The DT-100U allows your cash drawer to connect directly to a computer, eliminating the need for a printer as an intermediary. This simplifies installation, reduces clutter, and provides reliable communication between your POS software and the cash drawer.

Easy Installation and Compatibility

- Powered entirely through the USB port, no external power required
- Supports "Hot Plugging" for instant plug-and-play use
- Automatically recognized by your computer without COM port adjustments
- Works with any standard cash drawer command

Reliable Operation and Multiple Device Support
The USB Cash Drawer Trigger uses a virtual serial interface, making it compatible with most POS software. Each device is assigned a unique serial number, and multiple modules can be connected to a single PC, allowing flexible setup for larger retail operations. Writing data to the drawer's COM port will reliably trigger the cash drawer to open.
