Its female-to-female design is useful when connecting two DVI cables or extending an existing DVI connection. Buy now from our website for a practical DVI connection solution in South Africa.

Overview Summary

Microworld DVI009 DVI-I Female to DVI-I Female 24+5 Adaptor is a compact DVI adapter designed to join two DVI-I cable connections. It features a DVI-I female connector on both ends, with each connection using the 24+5 pin configuration.

The DVI-I interface supports digital and analog display signals, making this adaptor suitable for compatible DVI-I cables and display equipment. It can be used to extend or join two DVI cables where a female-to-female DVI connection is required.

The compact adapter design makes it useful for desktop computers, graphics cards, monitors and other compatible DVI-I display equipment. No drivers are required for this type of passive connection adapter. Buy for quick delivery and shop now and save.

Performance tier: Standard DVI connection adapter

Uses: DVI cable extension, joining DVI cables, computer displays, monitors, graphics card connections, DVI-I equipment

Description

The Microworld DVI009 is a DVI-I female-to-female adaptor designed to connect two DVI-I cable ends. Both sides of the adaptor use DVI-I female 24+5 connectors, providing a straightforward solution when two compatible DVI cables need to be joined together.

DVI-I is designed to carry digital and analog display signals. The DVI009 can therefore be used with compatible DVI-I cables

and equipment where the required connection type is DVI-I female on both sides. It is particularly useful for extending an existing DVI connection or joining two DVI cables into a continuous connection.

The compact adaptor is suited to desktop computer and display setups that still use DVI connectivity. It does not require software or drivers because it provides a direct physical connection between compatible DVI interfaces.
