Description

The UniQue E0005 PCI-e x1 to 4x USB 3.0 Ports Card is designed for desktop computers that require additional USB connectivity. By using an available PCI Express x1 slot, the card adds four USB 3.0 ports to the system, allowing more USB devices to be connected without relying solely on the computer's existing ports.

With four USB 3.0 ports, the E0005 is suitable for connecting commonly used peripherals such as external storage devices, printers and other USB equipment. This makes it useful for upgrading older or connectivity-limited desktop computers used in

home, office and professional environments.

The PCIe expansion design provides a direct internal connection to the desktop computer. Installation requires a compatible PCI Express x1 slot and the appropriate operating system support. The product is supplied as a practical expansion solution for users who need additional USB connectivity.
