Overview Summary

Everki EKP119 16 Inch Flight Checkpoint Friendly Notebook Backpack

The Everki EKP119 combines professional styling with intelligent organization for everyday commuting and business travel. Its dedicated checkpoint friendly laptop compartment allows faster airport security screening while protecting notebooks up to 16 inches. Multiple compartments provide organized storage for tablets, chargers, documents, cables, and accessories.

Comfort is enhanced with Everki's ergonomic back panel, adjustable 5-point balance strap system, and padded shoulder straps that distribute weight evenly during extended use. Additional features such as side access pockets, headphone cable outlet, water bottle loop, and durable metal zipper pulls make this backpack a practical choice for daily business, university, and travel applications.

Performance tier:Premium Business Travel Backpack

Uses:Business travel, daily commuting, office, university, laptop transport, airline travel, mobile professionals

Description

The Everki EKP119 Flight Checkpoint Friendly Notebook Backpack is designed for professionals who require secure protection, organized storage, and carrying comfort throughout the day. Its dedicated laptop compartment accommodates notebooks up to 16 inches while the separate tablet pocket helps keep mobile devices protected during travel.

The checkpoint friendly design allows the laptop compartment to open flat during airport security screening, helping simplify travel while maintaining protection for valuable equipment. Multiple internal organizer pockets make it easy to store chargers, cables, documents, stationery, and personal accessories in dedicated locations for quick access.

Comfort remains a priority thanks to the ergonomic back panel and padded shoulder straps combined with the 5-point balance strap system that distributes weight more evenly across the shoulders. Easy access side pockets, a water bottle loop, headphone cable outlet, and durable large zipper pulls further improve everyday usability whether travelling for business, commuting to work, or attending university.

- Multifunction mini straps for additional storage options.
- Professional design suitable for business and travel.

The Flight Series - now you're ready for take-off

The Flight series of laptop bags is designed with organization and carrying capacity in mind. They are rugged enough for the seasoned road warrior, yet sleek enough for the mobile professional. The Checkpoint Friendly design allows you to effortlessly sail through security checkpoints and makes the bags perfect for frequent flyers. These laptop bags capably handle all your technology needs, with a dedicated laptop compartment and an iPad/Kindle/tablet pocket that are lined with super-soft felt. The Flight bags maintain a compact profile, and have well thought-out spots for just about everything you could want to take with you on a trip or on your daily commute to the office. With high quality materials, durable construction and well executed features, the Flight series of bags ensures that you're always ready for takeoff.

Built for the frequent flyer

The Flight Laptop Backpack has all the features a frequent flyer demands, and it's built with ergonomics in mind. The 5-point balance strap system, cushioned back panel and wide shoulder straps make it comfortable, even when it's fully loaded. And you know it's the details that make or break a bag, so you'll appreciate the top pocket for your phone with a cable outlet, the easy access side pockets, and the "see everything" interior pockets made with mesh that lets you see what's stored inside. There are multi-function mini straps to quickly slip your sunglasses into, and even taller water bottles won't slide out of the side pocket when held in place with the water bottle loop. With the Flight Backpack, you're prepared for any journey.

Travel friendly laptop compartment

Airport security can be a hassle, so we designed the Flight with our hassle-free 180 degree fold-out laptop compartment that allows you to breeze through airport security without removing your device from the bag. Simply open the Flight up 180 degrees, lay it flat, and your bag will quickly pass through the scanner. Should you need to remove your laptop, you can take it out and replace it without rummaging through your backpack or removing other contents.

Felt-lined iPad/Kindle/tablet pocket

With a dedicated slot designed to hold your iPad or Kindle, you'll never leave your tablet vulnerable to the ravages of an ill-fitting compartment again. The dedicated pocket in the Flight Backpack keeps your tablet from getting rubbed or dinged by the other items in your bag; and it's lined with the same super-soft felt that's found in the laptop pocket. Once your iPad or Kindle is tucked away in the inner pocket, you can rest assured that it will be just as well protected as your computer.

5-point balance strap system

When your backpack is fully loaded it can get heavy, so we engineered a 5-point balance strap system to ergonomically distribute the weight and reduce muscle strain. The pillow-soft straps that adjust at the shoulders, two quick-slide straps at the bottom and one across the chest give you total control. The weight distributing chest strap also relieves some of the weight

from your shoulders and brings it forward, giving greater balance. The Flight Backpack's ergonomically designed carry system provides balanced comfort, even when your backpack is full.

Ergonomic back panel and shoulder straps

The Flight Laptop Backpack incorporates a contoured shoulder strap to strategically balance the load and reduce muscle strain. You'll also find a padded back panel, mesh padding and deep airflow channels to provide maximum air circulation for breathability.

Multifunctional side pockets with water bottle loop

The two side pockets on the Flight Backpack allow you to safely secure your water bottle with the elastic loop, or stash accessories such as chargers and adapters. Plus, they're fully zippered for a sleek and sophisticated profile.

Large zippers and metal pulls

Have you ever broken a zipper on your favorite bag? We have. That's why we designed the Flight using heavy duty zippers with extra large metal pulls. So your favorite bag can remain your favorite bag.

High-contrast lining

All EVERKI interiors are stylish, high-contrast orange because we know how frustrating it is to mistakenly leave a compartment unzipped, and how difficult it is to organize against a black background. Savvy and Stylish.

Peace of mind

EVERKI makes products of value because we value our relationships. Every product EVERKI makes comes with our Limited Lifetime Warranty which covers manufacturing defects over the entire life of the product. EVERKI. We give you peace of mind.
