- Travel friendly 17.3-inch laptop/tablet compartment
- Hard-shell quick-access sunglasses case
- Patented corner-guard protection system
- RFID-protected pocket
- Trolley handle pass-through
- Premium leather handle and accents

Features:

The 17.3-inch laptop backpack with premium features and smart styling

Our Concept 2 backpack is designed for the mobile professional who demands organizational functionality and wont sacrifice on style. Weve crafted the Concept 2 using our highest quality materials, such as ballistic nylon and top grade leather handle and accents. Only premium features are included, like our unique hard-shell sunglasses case, an RFID-protected pocket, and patented corner-guard protection system on the laptop pocket. The modern aesthetics and fresh styling of the bag let you stand out in a crowd. The Concept 2 showcases the quality you expect in an EVERKI bag.

Intuitive design

The Concept 2 backpack is thoughtfully engineered with streamlined spaces and select features for your business travel. The technology compartment consists of a felt-lined laptop pocket that stores up to a 17.3-inch laptop and a separate felt-lined pocket for your tablet. Your microchipped passports and credit cards are protected in our RFID-protected pocket, and if you need further security for additional documents, use the bottom rain cover pocket as an optional hidden stash. The main compartment is spacious and roomy, with a file divider to keep your important papers and files organized; and your sunglasses or reading glasses are carefully protected when you tuck them away in the hard-shell quick-access case on the top of the bag. The Concept 2 - features that matter.

Travel friendly

Going through airport security can be a hassle, so we designed the technology compartment in the Concept 2 to help you pass through security quickly and easily. The dedicated compartment that stores both your laptop and tablet is immediately accessible, so if you have to remove your devices for screening, you can simply unzip the technology compartment and access them without rummaging through the rest of your bag. And if you happen to go through a security checkpoint that acknowledges Checkpoint Friendly bags, you can just open that compartment up 180 degrees, lay it flat, and let your bag quickly pass through the scanner.

Hard-shell quick-access sunglasses case

Are your sunglasses or reading glasses a traveling necessity Then you definitely want them protected inside your bag. Our unique hard-shell sunglasses case was designed specifically with this in mind. There is plenty of space in the built-in hard case for your sunglasses or reading glasses, as well as an additional nylon tuck-away for your phone or ear buds. And because its positioned on the top of the bag, you wont have to fumble around looking for them when you need them. Your glasses are safe, secure and right at your fingertips.

Patented corner-guard protection system

When you travel with your backpack as your mobile office, your laptop has to be securely protected. Thats why weve engineered the Concept 2 with extra padding in the lining of the laptop pocket and molded-to-fit laptop corner guards. Our patented corner-guard protection system uses form-fitting corners to wrap snugly around the bottom of your laptop pocket, to protect against knocks and bumps - or if you accidentally set your bag down too abruptly. The shock-absorbing system of the Concept 2 will give you peace of mind, knowing your laptop is safe inside your bag.

Trolley handle pass-through

When traveling with many bags, the trolley handle pass-through on the back of the Concept 2 allows you to double your efforts. Simply slip the backpack onto the handle of your luggage and youre ready to wheel through the airport.

RFID protection

Carrying passports or credit cards with microchips may make you vulnerable to illegal remote scans. So we designed the Concept 2 to protect the sensitive data on your passport and credit cards with an RFID-protected pocket. Simply slip your sensitive items into the secure pocket, and your information is safe from unwanted RFID scans.

High-contrast lining

All EVERKI interiors are stylish, high-contrast orange because we know how frustrating it is to mistakenly leave a compartment unzipped, and how difficult it is to organize against a black background. Savvy and Stylish.

Large zippers and metal pulls

Have you ever broken a zipper on your favorite bag We have. Thats why we designed the Concept 2 using heavy duty zippers with extra large metal pulls. So your favorite bag can remain your favorite bag.
