Features:

Turn complex ideas into clear visuals

Work as a team to easily create and share data-linked diagrams to bring your ideas to life.

Flexible editing

Change shapes in existing diagrams without losing your layout and shape connections, making it simple to adjust the look of your diagram without losing the work you've already done.

Supports multiple data sources

Visio supports Microsoft Excel workbooks, Microsoft Access databases, Microsoft SharePoint Foundation lists, Microsoft SQL Server databases, Microsoft Exchange Server directories, Azure Active Directory information and other OLEDB or ODBC data sources.

Simultaneous teamwork

See who's working on which part of the diagram, get notifications about changes and choose when to merge those changes into the master file.

Data-driven diagramming

Automatically generate org charts from data sources like Excel, Exchange or Azure Active Directory.

AutoCAD support

Ability to import DWG files, including enhanced file format support.

Supports industry standards

Visio's huge shape library supports Unified Modelling Language (UML) 2.5, Business Process Model and Notation (BPMN) 2.0 and Specification and Description Language (SDL).

Easy data linking

Connect your Visio shapes and diagrams to data from common internal and external sources. Insert data graphics or use formatting to reflect changes in the underlying data in your diagram.
