ESD-BD2018-IS4

Bitdefender Internet Security 2018 - 1 year 4 devices - License Key Only (ESD)

Product Overview

Bitdefender Internet Security 2018 - 1 year 4 devices - License Key Only (ESD)

Specifications

Ultimate Windows Protection, Uncompromising Speed

Bitdefender Internet Security 2018 includes complete protection for Windows.

- Complete Data Protection
- Advanced Threat Defense
- Multi-Layer Ransomware Protection
- Anti-Phishing
- Anti-Fraud
- Safe Files
- Secure Browsing
- Rescue Mode

Performance

- Bitdefender AutopilotTM
- Bitdefender PhotonTM
- Battery Mode
- Cloud Integration
- Game, Movie & Work Modes

Privacy

-
- Webcam Protection
- Safe Online Banking
- Parental Advisor
- File Shredder
- Privacy Firewall

- Social Network Protection
- Password Manager
- Vulnerability Assesment

Protection

Complete Data Protection

Absolute power in the most efficient antivirus available today. Bitdefender Internet Security 2018 works against all threats - from viruses, worms and Trojans, to ransomware, zero-day exploits, rootkits and spyware. Your data and your privacy are in good hands.

Advanced Threat Defense

Bitdefender Internet Security 2018 uses a technique called behavioral detection to closely monitor active apps. The moment it detects anything suspicious, it takes instant action to prevent infections.

Webcam Protection

Protect your privacy and prevent webcam leaks. Webcam Protection notifies you when apps try to access your webcam, and lets you block unauthorized access.

Multi-Layer Ransomware Protection

You can place sensitive documents under multiple layers of protection, so they are safe from malicious encryption programs that demand ransom on your personal files.

Anti-Phishing

Bitdefender Internet Security 2018 sniffs and blocks websites that masquerade as trustworthy in order to steal financial data such as passwords or credit card numbers.

Anti-fraud

Our advanced filtering system warns you whenever you visit websites that may try to scam you, such as casinos, porn sites, money loan schemes and others.

Safe Files

With Bitdefender Safe Files you can prevent unauthorized changes to your most important files. You simply add folders to the watch list, and Bitdefender guards the files stored in them against ransomware and other types of malware. Only applications that you explicitly trust are allowed access to your Safe Files.

Secure Browsing

Find out whether your search results are safe to access before you actually click on a link. Bitdefender Internet Security 2018 also blocks known infected links.

Rescue Mode

Some sophisticated viruses, like rootkits, need to be removed before Windows starts. When Bitdefender Internet Security 2018 detects such threats, it reboots the computer in Rescue Mode for clean-up and restoration.

Performance
Bitdefender Autopilot™

Once switched on, Autopilot will run your entire cyber-security by itself. It makes optimal security decisions without asking for your input through nagging pop-ups and dialog boxes. Nothing to set up, nothing to configure.

Bitdefender Photon™

This innovative, exclusive technology helps Bitdefender Internet Security 2018 adapt to the hardware and software

configuration of your system in order to save computing resources and improve speed and performance.

Global Protective Network

Most of the heavy scanning takes place in the cloud, so there is virtually zero impact on your local resources. This means your system's speed and performance remain unaffected. And your files always remain completely private: we do not scan the actual contents of your files, and we never upload or store them in the cloud.

Game, Movie and Work Modes

Bitdefender Internet Security 2018 detects when you play, work or watch a movie, so it knows not to bother you with unnecessary requests. This way, you can focus on what's important. Depending on what you choose to do on your computer, Bitdefender temporarily halts pop-ups, adjusts visual settings, and pauses unimportant background activities to allow you to enjoy your device to the max.

Battery Mode

This useful, intelligent feature saves battery life for laptops and tablets by temporarily tweaking system settings such as display, system cooling, system updates or Bluetooth connectivity.

Privacy
Worry-free and fast online

Bank and shop from a unique, dedicated browser that secures your transactions to prevent fraud. Bitdefender Safepay can now also automatically fill out credit card details in billing fields.

Parental Advisor

With Parental Advisor, you can discreetly supervise your children's online activities to keep them safe. Filter out inappropriate content and control online time for each child's account. Simply log in to your web Bitdefender Central account from anywhere, and keep up with your kids' location or activities.

Privacy Firewall

With Bitdefender Internet Security 2018 you get a powerful layer of network protection, so your personal information stays safe from hackers and data snoops.

Social Network Protection

Stay safe from malicious links and any threats that your friends unwittingly pass on to you via Facebook, Twitter, Pinterest or other social networks.

Password Manager

Store your passwords, credit card information and other sensitive data in a secure vault for easy access whenever you need them. Password Manager gives you the option to autofill online forms and can even recommend secure passwords.

File Shredder

Use this tool when you wish to delete a file for good and leave no traces that it ever existed on your PC.

Quick Risk Checker

Scan for security holes and vulnerabilities with just one click. Bitdefender Internet Security 2017 checks your PC for outdated and vulnerable software, missing Windows security patches and potentially unsafe system settings, and will indicate the best fix.
