Microsoft DSP SP1 Windows 7 Home Basic 32-BIT

Product Overview

Microsoft DSP SP1 Windows 7 Home Basic 32-BIT

(DSP software can only be purchased for new systems with no O.S. installed)

Specifications

Overview:

- Microsoft Windows 7 Home Basic makes it simpler to get to the programs and documents you use most often, so you can spend less time looking and more time doing.
- Make the things you do every day faster and easier with Windows 7 Home Basic 32 Bit Edition Service pack 1.
- Simpler and easier to use.
- Features like Jump Lists, Pin, Snap, and Windows Search all make using a small notebook PC simple and easy. Connecting to printers and devices is easier than ever.

Features:

Makes home networking easy

- Joining home networks with other PCs running is easy and simple.
- Connecting to wireless networks is easy and fast.
- Internet Explorer 8 improves the safety of web browsing.

HomeGroup

- Easily share the photos, music, and files on each of the PCs running Windows 7 on your home network. It's especially handy when you want to share a printer.
- Have you ever needed to print a file at home when you weren't connected to a printer? Did you decide that even with a home network, it was easier to just put the file on a USB drive and take it to the PC with the printer? That's one reason we created HomeGroup. New with Windows 7, HomeGroup takes the headache out of sharing files, devices, and printers on a home network. Connect two or more PCs running Windows 7, and HomeGroup makes it easy to automatically start sharing your music, pictures, video, and document with others in your home.
- Concerned about privacy? HomeGroup is password-protected so you just set up one password for all your PCs and you're ready to go. You can decide what gets shared and what stays private, or use "Share with" to decide who you want to share specific folders with. You can also make your files "read only," so other people can look at (but not change) your stuff.
