This advanced gaming mouse features macro programmable buttons, RGB lighting, and a high performance Pixart sensor for smooth tracking. Shop now for reliable wireless control and enhanced gaming accuracy in South Africa.

Overview Summary

The Armaggeddon Mikoyan Foxbat-III Cyberpunk White Wireless Gaming Mouse is designed for gamers who need speed, accuracy, and wireless freedom in one compact device. It combines a high precision Pixart sensor with adjustable CPI settings ranging from 500 to 10000, making it suitable for both fast paced FPS gaming and detailed creative work.

With stable 2.4G wireless technology, this mouse delivers a lag free connection with up to 8-10 meter range. The built-in 600mAh lithium battery provides extended usage time, while auto sleep functionality helps conserve power during inactivity.

Its lightweight 84g frame and ergonomic design reduce hand fatigue during long gaming sessions. The customizable 6-button layout with macro support allows users to tailor controls for different games or productivity tasks.

Performance tier: Mid-range gaming

Uses:PC gaming, FPS gaming, MOBA gaming, office productivity, general computing

Description

The Armaggeddon Mikoyan Foxbat-III Cyberpunk White Wireless Gaming Mouse delivers a balance of performance and style with its cyberpunk inspired aesthetic and advanced wireless technology. Built for competitive gamers, it features a precision tuned Pixart sensor capable of up to 10000 CPI for highly accurate tracking.

The 2.4G wireless connection ensures stable, low latency responsiveness, making it suitable for fast paced gaming environments where every millisecond matters. Its lightweight structure and ergonomic shape provide comfortable control

during extended sessions.

Designed with customization in mind, the mouse includes programmable macro buttons and adjustable sensitivity settings, allowing users to optimize performance across different game genres and workflows.

FAQ

Is this mouse suitable for competitive gaming?

Yes, the high CPI range, low latency wireless connection, and Pixart sensor make it suitable for competitive FPS and MOBA gaming.

How long does the battery last?

The built-in 600mAh battery provides extended usage depending on lighting and usage intensity, with power saving auto sleep support.

Can I customize the buttons?

Yes, the mouse supports macro programming on multiple buttons for personalized gaming or productivity setups.

Does it work with all PCs?

Yes, it is compatible with most Windows PCs and laptops that support USB 2.4G wireless receivers.

Is the mouse good for long use sessions?

Yes, its lightweight 84g design and ergonomic shape reduce fatigue during extended gaming or work sessions.
