LG 24X Internal Writer

Product Overview

LG Super Multi Internal 24x DVD Rewriter with M-DISC Support, 52 x CD Read / 52 x CD Write / 32 x CD-RW / 24 x DVD+R / DVD-R Write

Specifications

Overview:

24x writing speed
Instantly enhance any system and enjoy a higher level of disc writing performance at a max speed of 24x. This increased speed lets you burn more discs in less the time, therefore allowing you to enjoy greater time management and overall efficiency.

Superior data protection with m-disc support
The m-disc uses a patent rock-like recording surface instead of organic dye to etch your data onto a disc. The m-disc has been tested and proven to outlast standard dvds currently on the market.

Play in peace
As a disc is being read, silent play technology automatically controls the disc read speed for optimal noise reduction.

Nonstop playability
Jamless play automatically prevents stop video playback in case of damaged disc, such as scratches or fingerprints by jumping through the erroneous data or damaged areas.

Sata
Serial ata is a 1.5gbps evolutionary replacement for the parallel ata physical storage interface used to connect storage devices, such as hard disks, dvd and cd rewriters to the pc motherboard. Serial ata is scalable, enables design of smaller pcs, and will allow future enhancements to the computing platform.
