Dtech HDMI extender 60m over CAT5/6 with local Display and IR, Support 3D, Max 1080p Resolution, Up to 60m via CAT6, Up to 35-50m via CAT5e, Supports Infra Red transmission

Specifications

Overview:

HDMI Extender (60m - CAT5/6) with Local Display and IR

The HDMI Extender kit is an ideal device for displaying your media on a local monitor, as well as extending to a second monitor further away. This makes the HDMI Extender kit extremely useful for security professionals (having one HDMI output locally to view the NVR video feed on a monitor close by, and extending the video feed to a second monitor further away).

The Extender Kit also supports Infra Red pass through, allowing you to change channels from the extended receiver further away. Using a single Ethernet cable between the Sender and Receiver also simplifies installations, and saves costs on expensive lengthy HDMI cables.

The HDMI extender kit can be used with CAT5e cabling up to 35-50m, while CAT6 cable can be used to to extend up to 60 meters.

- Support 3D, max 1080p resolution
- Can extend 35-50m via CAT5e, and up to 60m via CAT6
- Receiver has EQ auto-adjust switch, ensuring signal remains in the best condition

- One local HDMI output on Sender, and one HDMI output on Receiver
- Supports Infra Red transmission
