Overview Summary

Microworld HDMITCON Micro HDMI + Mini HDMI to HDMI Adapter is a compact HDMI connector designed with both a Micro HDMI male connector and a Mini HDMI male connector, providing compatibility with devices that use either of these smaller HDMI connection types.

The female standard HDMI connection allows a compatible standard HDMI cable to be connected to the selected Micro HDMI or Mini HDMI connector. This makes the adapter useful for connecting portable devices to HDMI-equipped displays and other compatible equipment.

Performance tier: Entry-level connectivity accessory

Uses: Connecting Micro HDMI devices, connecting Mini HDMI devices, connecting cameras to HDMI displays, connecting camcorders to HDMI displays, connecting portable devices to TVs and monitors

Description

The Microworld HDMITCON is a compact HDMI adapter designed to provide connectivity between devices using smaller HDMI connector formats and a standard HDMI cable. It combines a Micro HDMI male connector and a Mini HDMI male connector with a standard HDMI female connection.

This configuration provides a practical connection option for compatible portable electronics that feature Micro HDMI or Mini

HDMI output ports. The standard HDMI female connector can accept a compatible HDMI cable for connection to a suitable HDMI-equipped television, monitor, projector or other display device.

The adapter is compact and lightweight, making it convenient for everyday use and portable setups. It can be particularly useful when a device has a Micro HDMI or Mini HDMI port but the available HDMI cable uses a standard HDMI connector.
