Specifications

Features:

Tough to Beat
The Echelon series evokes the excitement of first person shooters, and features a military camouflage-inspired livery to match in-game weapons and uniforms. Gaming aside, it's also a great headset for everyday use! Connect Echelon to your desktop, laptop, PlayStation® 4, smartphone or tablet to experience superb sound with brilliant detail and punchy bass no matter what you're listening to.

Large 50mm neodymium-magnet drivers
Large 50mm neodymium drivers support better sound positioning within games, so users gain increased awareness of environments, opponent actions and locations. Deep bass lends unmistakable impact to everything from soundtracks to explosions, while the wider range benefits from crystal-clear delivery and extremely low distortion. The frequency response curve has been optimized for gaming output, reinforcing the reproduction of footstep and gunshot sounds to augment spatial awareness, response accuracy and win rates.

Retractable noise-filtering microphone
Taking community feedback into account, ASUS Echelon Navy uses a retractable and flexible microphone boom for easier angle adjustment and neat storage when not in use. New microphone noise filtering technology boasts more sensitive voice capture capabilities for clearer in-game communications.

PC and Mac compatible...
Splitter cable with 3.5mm separate audio/mic connectors, You can forget compatibility worries with Echelon Navy because it works with almost any device. The 1.2m main connecting cable can be paired with a 1.3m extension with a control box featuring separate headphone and mic jacks for improved compatibility.

...and even consoles, smartphones and tablets
Connect to smart devices and PS4, Echelon Navy is also perfect for smartphones, tablets and PlayStation® 4, thanks to the

3.5mm audio/mic combined connector. Plug into your smart device to keep in touch with family or friends on the road or PlayStation® 4 for gaming. Our research shows 1.2m is the perfect cable length for mobile or PlayStation® 4 joystick use- so no more knots and tangles!

Effective 30dB noise isolation
Noise ranks as one of the leading issues for gamers, often leading to distractions and wrong decisions in the heat of the moment. The Echelon Navy is designed in such a way that the ear cups effectively block out disruptions such as environmental noise and human voices, two of the main noisemakers in gaming events. Even tiny noises can mask crucial sound details, so make sure your gaming gear fully immerses you in gameplay so you can make the right call.

Full size 100mm over-ear cushions for a snug fit
The headband has been lab tested to provide optimized clamping force for a wide range of head sizes. This Echelon Navy provides a great universal fit for unsurpassed comfort even during marathon gaming sessions. Full-coverage 100mm over-ear cushions comfortably cup the ears, and feature a high quality leather treatment to minimize ear fatigue.

Stylish carry bag included
Echelon Navy has its own carry bag for durable and lasting protection whether you're travelling or storing the headset when not in use.
