

IM360R ARGB W

Antec Infinity Matrix PWM 360mm ARGB Reverse Case fan single Frame - White

Product Overview

Antec Infinity Matrix PWM 360mm ARGB Reverse Case fan single Frame - White, Fan size of 360 mm, Maximum Speed of 1800 rpm with 4 pin PWM Control, Airflow rating of 134.9 CFM, Static Pressure of 1.34 mmH₂O for resistance Airflow, Maximum noise Level of 33.2 dB, ARGB Lighting functionality included

Specifications

Overview Summary:

Upgrade your computer's cooling with the Antec INFINITY MATRIX PWM 360mm ARGB Reverse Case Fan in sleek white. Designed for South African PC enthusiasts, this single-frame unit delivers robust airflow up to 134.9 CFM while maintaining low noise levels of just 33.2 dB. Whether you are building a custom gaming rig or need reliable thermal management for intense workloads, the PWM control allows precise speed adjustments up to 1800 RPM, ensuring your system stays cool and quiet.

The included ARGB lighting adds a vibrant touch to your white-themed build without overpowering the clean aesthetic. With clear dimensions of 36.4 x 12.4 x 2.8 cm, this fan fits standard mounting points easily. Secure your cooling solution today by buying now and experience superior performance for your hardware.

Performance tier:High-End

Uses:PC case cooling, thermal management, gaming rigs, white build aesthetics, system airflow optimization

Overview:

The Antec INFINITY MATRIX PWM 360mm ARGB Reverse Case Fan Single Frame - White delivers a perfect blend of high-performance cooling and sleek aesthetics for your custom PC build. Designed specifically for enthusiasts who demand both efficiency and style, this unit pushes up to 134.9 CFM of airflow while maintaining a quiet operation at just 33.2 dB even at peak speeds. Whether you are pushing components to their limits or building a pristine white-themed system, the INFINITY MATRIX ensures your hardware stays cool without compromising on noise levels.

Description:

This single-pack fan combines powerful thermal management with customizable ARGB lighting in a premium white finish. It features a 360mm size optimized for radiators and cases requiring high static pressure, supported by a 4-pin PWM connector that allows precise speed control up to 1800 RPM. The reverse blade design and integrated addressable RGB LEDs make it an ideal centerpiece for modern builds, ensuring clean lines and vibrant lighting effects without the need for complex wiring.

Features:

Performance That Keeps Up With Your Workload

When your system is under heavy load, standard fans often struggle to maintain temperatures or become too noisy. The Antec INFINITY MATRIX PWM addresses this by delivering a robust 134.9 CFM of airflow and a static pressure of 1.34 mmH₂O, allowing it to push air effectively through dense heatsinks or radiators. You can rely on the 4-pin PWM connector to adjust fan speeds dynamically from idle to full load, ensuring your PC runs as quietly as possible when you are working and cools aggressively when gaming or rendering.

The balance between cooling power and acoustic comfort is critical for a pleasant computing experience. This model achieves a maximum noise level of 33.2 dB at its top speed of 1800 RPM, meaning you get the performance boost you need without an overwhelming roar. The reverse fan configuration further optimizes airflow direction, ensuring that cool air is drawn efficiently through your case components rather than just circulating aimlessly.

Aesthetic Appeal for Custom Builds

Beyond raw numbers, the visual impact of a PC build matters greatly to many users. This unit features a clean white frame and blades that hide well within a chassis while the integrated ARGB lighting adds a customizable accent. The addressable RGB system allows you to sync colors with other components in your setup, creating a cohesive look that stands out without being

overwhelming.

For builders planning a specific color scheme, the dimensions of 36.4 x 12.4 x 2.8 cm make it easy to verify fitment before purchase. The product part number IM360R ARGB W identifies this specific white variant with ARGB capabilities and PWM control, ensuring you order the correct version for your case layout.

To help you plan your cooling solution effectively, here are the key technical specifications derived from the manufacturer data:

- Airflow: 134.9 CFM for efficient heat dissipation
- Max Speed: 1800 RPM with PWM control for variable performance
- Noise Level: Maximum of 33.2 dB for quiet operation
- Static Pressure: 1.34 mmH2O to overcome case resistance
- Fan Size: 360mm diameter suitable for large radiators
- Connector Type: 4-pin PWM for precise fan curve management
- Lighting: ARGB with customizable color effects
- Finish: White frame and blades for modern aesthetics

What's in the Box

- 1 x Antec INFINITY MATRIX PWM 360mm ARGB Reverse Case Fan Single Frame - White

Choosing a fan from a brand like Antec means selecting components with clearly documented capabilities, making it simpler to integrate into your system without guesswork. The combination of high static pressure and low noise makes this unit suitable for water cooling setups or air-cooled systems where space is tight but airflow requirements are high.

Specifications	
Product Code	IM360R ARGB W
Fan Size	360 mm
Max Speed	1800 RPM
Airflow	134.9 CFM
Static Pressure	1.34 mmH2O
Max Noise Level	33.2 dB
Connector	4-pin PWM
RGB Lighting	Yes
Colour	White
Product Dimensions	36.4 x 12.4 x 2.8 cm

FAQ

What are the physical dimensions of this fan and is it suitable for standard case mounting?

The Antec INFINITY MATRIX PWM 360mm ARGB Reverse Case Fan Single Frame - White measures 36.4 x 12.4 x 2.8 cm, making it a single-pack unit designed to fit within cases that support 360 mm fan sizes.

Does this fan offer controllable speeds for balancing performance and noise?

ComX Computers

Product Specification Sheet

Yes, the fan features a 4-pin PWM connector that allows you to adjust the speed up to a maximum of 1800 RPM, keeping the acoustic output at a maximum level of 33.2 dB during demanding workloads.

Can I use this fan for cooling components with high heat output?

Absolutely, the unit delivers an airflow of 134.9 CFM and maintains a static pressure of 1.34 mmH₂O to effectively move air through case resistance, ensuring strong thermal performance.

Does this product include RGB lighting and is it compatible with white-themed builds?

This single-frame fan includes ARGB lighting accents and features a clean white finish specifically designed to match the aesthetic of white PC builds.

What components are included in the box upon purchase?

The package contains one Antec INFINITY MATRIX PWM 360mm ARGB Reverse Case Fan Single Frame - White, with no additional accessories or controllers listed as part of the standard delivery.
