About this product

The Insta360 Snap Selfie Screen with Light is a compact 3.5-inch touchscreen that lets you use your smartphone's rear camera for better quality selfies, vlogs and content while viewing a real-time preview. With a bright 550 nits LCD display, USB-C connection, magnetic attachment, 56 LED fill light, 3 colour temperature options and 5 brightness levels, it gives creators better framing and lighting in one portable accessory. Buy the Insta360 Snap Selfie Screen with Light from our website and create better smartphone content with greater control.

Overview Summary

Insta360 Snap Selfie Screen with Light

The Insta360 Snap Selfie Screen with Light is designed to solve a common smartphone photography problem - using the higher-quality rear camera for selfies and videos while still being able to see and control the shot. Its 3.5-inch LCD touchscreen provides a 480 x 800 pixel display with 550 nits brightness and a 60Hz refresh rate, allowing you to preview framing and access compatible camera controls while shooting.

The integrated 56 LED fill light adds useful illumination for selfies, vlogging, beauty content, product demonstrations and social media creation. You can select from 3 colour temperature settings and 5 brightness levels to adapt the lighting to different environments. The screen connects directly through USB-C with DisplayPort Alt Mode support and does not require a separate battery or Bluetooth connection. Its magnetic design and protective cover make it practical for mobile creators who need a compact setup.

Performance tier: Creator

Uses: Selfies, vlogging, social media content, travel photography, beauty content, product demonstrations, video recording, group photos

Quick Specifications:

- Refresh rate: 60 Hz
- Brightness (nits): 550 nits
- Contrast ratio: -
- View angle (degrees): -
- Response time (ms): -
- Frequency (Hz): 60 Hz
- Sync: -
- Video ports: 1 x USB-C video output
- VESA: -
- Monitor performance tier: Creator
- Uses: Selfies, vlogging, social media content, travel photography, beauty content, product demonstrations

Strong reasons to buy

- Rear camera selfies: Use the superior rear camera on a compatible smartphone while viewing yourself on the external

screen.

- Bright display: The 550 nits 3.5-inch touchscreen provides a clear preview for framing and composition.
- Integrated fill light: The 56 LED light provides adjustable illumination with 3 colour temperature settings and 5 brightness levels.
- Simple wired connection: USB-C connectivity provides a direct screen connection without Bluetooth pairing or a separate screen battery.
- Creator focused design: Reviews highlight the bright display, practical magnetic attachment, integrated lighting and ease of use for mobile content creation.

Description

The Insta360 Snap Selfie Screen with Light is a portable smartphone accessory designed for people who want to get more from their phone's rear camera. Instead of trying to frame a selfie or vlog without seeing the rear camera view, the Snap provides a dedicated 3.5-inch touchscreen that mirrors the compatible smartphone display. This makes it easier to compose shots, position yourself correctly and control supported camera functions while using the main rear camera.

The LCD touchscreen has a 480 x 800 pixel resolution, 267 ppi pixel density, 550 nits brightness and a 60Hz refresh rate. The display supports touch interaction including tapping, swiping and pinch-to-zoom functions. A dedicated mirror button allows the preview to be changed, while the screen can also be used to control supported camera applications and view captured content.

The Light version adds an integrated 56 LED fill light developed with AMIRO. The lighting system provides 3 colour temperature options - cool, warm and natural - together with 5 brightness levels. This allows the user to adapt the illumination when shooting indoors, outdoors, while travelling or in lower-light environments.

The Insta360 Snap Selfie Screen with Light connects directly to compatible smartphones through USB-C and supports DisplayPort Alt Mode for video output. It does not require Bluetooth and does not contain a separate battery, drawing power from the connected compatible smartphone. This plug-and-play design keeps the accessory slim and portable while providing a direct connection for real-time screen mirroring.

The screen attaches magnetically to compatible phones and magnetic cases. A magnetic ring is included to assist with compatible devices that do not have built-in magnetic attachment. The supplied protective cover helps protect the screen during storage and can also secure the cable when it is not being used.

The Insta360 Snap Selfie Screen with Light is suited to smartphone creators, vloggers, travellers, social media users, beauty creators and anyone who wants better control when taking selfies or recording video with a rear camera. Compatible phones must support USB-C and the required DisplayPort functionality. Lightning to USB-C adapters are not supported.

Features

The Insta360 Snap Selfie Screen with Light combines a touchscreen rear-camera preview with integrated adjustable lighting in a compact magnetic design.

- 3.5-inch LCD touchscreen: Provides a dedicated display for viewing and controlling the mirrored smartphone screen.
- 480 x 800 resolution: Provides a detailed preview for framing photos and videos.
- 550 nits brightness: Provides a bright display for clearer viewing.
- 60Hz refresh rate: Provides smooth screen operation and preview.
- 56 LED fill light: Provides additional illumination for selfies, vlogs and content creation.
- 3 colour temperatures: Choose between cool, warm and natural lighting.
- 5 brightness levels: Adjust the integrated light according to the shooting environment.
- USB-C connection: Connects directly to compatible smartphones using USB-C video output with DisplayPort Alt Mode.
- Touch controls: Supports tap, swipe and pinch-to-zoom interaction.
- Rear camera preview: Allows the smartphone rear camera to be used while viewing the composition on the Snap screen.

ComX Computers

Product Specification Sheet

- Magnetic attachment: Attaches to compatible magnetic smartphones and cases.
- Magnetic ring included: Helps provide magnetic attachment for compatible devices without built-in magnetic attachment.
- Protective cover: Helps protect the screen during storage and secures the cable when not in use.
- Third-party camera app support: Works with supported third-party camera applications for flexible content creation.
- No separate charging required: The screen is powered through the connected compatible smartphone.
- Portable design: Measures 103 x 67.5 x 8.2 mm and weighs 88.6 g.

Utilize your rear camera: Frame every shot perfectly.

No more "blind shots." Insta360 Snap allows you to capture exactly what your powerful rear camera sees.

First vlog Keep it light.

Who says great image quality has to be expensive With Insta360 Snap, your phone's rear camera becomes a true "what you see is what you get" view, delivering pro-level shots. Your phone is your most powerful production tool.

Real-time preview.

Connect via USB-C for a stable feed that beats wireless. Recording 4K Enjoy smooth, lip-synced visuals*.

Don't wait, capture now.

Taking it back to basics. No Bluetooth connection, no charging required, just plug in and start capturing!

Ultra-thin & portable.

Ultra-compact design for easy one-handed use. At only 7.3mm thick*, it attaches magnetically to your phone without adding bulk.

Professional lighting.

Co-developed with AMIRO, the Selfie Screen with Light offers 3 colors and 5 brightness levels. It softens shadows and imperfections so you can achieve a glowing complexion, even in low light.

Travel-ready, 2-in-1 protective cover.

Premium cover that protects the screen from scratches during storage, minimizes accidental touches on your phone's screen, and secures the cable when not in use.

Works with your favorite apps.

Want the quality of the rear camera but the filters of your favorite beauty apps Snap bridges the gap. Compatible with third-party camera and social apps*, so you can combine high-res hardware with creative software for stunning results.

Magnetic snap-and-shoot.

Strong magnetic attachment keeps it secure. Attaches directly to iPhones and a wide range of Android devices with the help of the included Magnetic Ring.

FAQ

What is the Insta360 Snap Selfie Screen with Light?

The Insta360 Snap Selfie Screen with Light is a 3.5-inch touchscreen accessory that lets compatible smartphones use their rear camera for selfies and video while providing a real-time preview on the external screen.

What is the main benefit of the Insta360 Snap Selfie Screen with Light?

It allows you to use the smartphone's rear camera while still seeing yourself and controlling compatible camera functions, making it easier to frame selfies, vlogs and other content.

Does the Insta360 Snap Selfie Screen with Light have a built-in light?

Yes. The Light version has 56 integrated LEDs with 3 colour temperature settings and 5 brightness levels for adjustable fill lighting.

Does the Insta360 Snap Selfie Screen with Light need to be charged?

No. The screen does not contain a battery and is powered through the connected compatible smartphone using its USB-C connection.

What screen resolution does the Insta360 Snap Selfie Screen with Light have?

The screen has a 480 x 800 pixel resolution with a 3.5-inch LCD display, 267 ppi pixel density, 550 nits brightness and a 60Hz refresh rate.

Does the Insta360 Snap Selfie Screen with Light use Bluetooth?

No. The screen uses a direct USB-C connection with DisplayPort Alt Mode support rather than Bluetooth for screen output.

Which smartphones are compatible with the Insta360 Snap Selfie Screen with Light?

Compatibility depends on the smartphone model. Compatible devices require USB-C connectivity and support for the required DisplayPort functionality. The current supported list includes selected iPhone, Samsung, Google, Huawei and other Android models.

Can the Insta360 Snap Selfie Screen with Light work with third-party camera apps?

Yes. The screen supports compatible third-party camera applications, allowing creators to use supported camera and social applications while viewing the mirrored display.

Can the Insta360 Snap Selfie Screen with Light be attached magnetically?

Yes. It can attach magnetically to compatible phones or magnetic cases. An included magnetic ring can assist with compatible devices that do not have built-in magnetic attachment.

Can the Insta360 Snap Selfie Screen with Light record 4K video?

The screen is a display and control accessory rather than a camera. Video recording resolution and frame rate are determined by the connected smartphone and its camera capabilities.

Is the Insta360 Snap Selfie Screen with Light waterproof?

No. The Insta360 Snap Selfie Screen with Light is not waterproof.

Is the Insta360 Snap Selfie Screen with Light suitable for vlogging?

Yes. Its rear-camera preview, touchscreen controls, integrated adjustable light and direct USB-C connection make it suitable for smartphone vlogging and social media content creation.
