KeyChron K2 84 Key Gateron White LED Brown Switches Mechanical Keyboard

Product Overview

KeyChron K2 84 Key Gateron Mechanical Keyboard White LED Brown Switches

Specifications

Overview:

The Keychron K2 84-Key Wireless Mechanical Keyboard is a super tactile wireless or wired keyboard giving you all the keys and function you need while keeping it compact, with the largest battery seen in a mechanical keyboard. Thanks to its versatile connection modes it can connect with up to 3 devices via Bluetooth and switch among them easily. Get high reliability and broad compatibility with the Broadcom Bluetooth 5.1 chipset, the K2 is the best fit for home, office and light gaming use while connecting with your smartphone, laptop and iPad. To add to this it also has a wired mode with a high-speed USB Type-C connection.

The Keychron K2 is designed to fit your dedicated typing experience. This particular model features Gateron Brown switches which are ideal for a gentle and tactile feel for gaming or the office. With a lifespan of 50 million keystrokes, we want to make sure that you experience the same feedback for every typing/gaming session. The K2 is highly compatible with all operating systems from Mac to Android to Windows. It is one of the few mechanical keyboards featuring Mac layout media keys, which allows you to use all the same media keys as you would in a conventional macOS.

It also features an 84 key design by retaining all the essential function keys like Page Up/Down, Home, End, and Screen capture (cmd+shift+4) which are important for your productivity. With N-key rollover (NKRO on wired mode only) you can register as many keys as you can press at once without missing out on characters. The K2 can last up to 240 hours of typing with the backlight off, thanks to its big 4000 mAh battery.

Features:

- Wireless with Bluetooth 5.1 or wired with Type-C
- 84 Gateron BROWN Mechanical Switches
- Non-hot-swappable Switches
- Mac/Windows Layout
- White LED-Backlit
- High Compatibility
