Kaspersky Internet Security 2014 - Multi-Device, South African Portuguese, 2 User , 1 Year, DVD

Product Overview

Kaspersky Internet Security 2014 - Multi-Device, South African Portuguese, 2 User , 1 Year, DVD

Specifications

Overview:

The one-licence, multi-platform solution for PCs, Macs & Android devices

Whichever device you use when you're banking, shopping, surfing or social networking online, the Internet holds the same security risks - including malware infections, cybercrime and phishing. So it's important to ensure all your connected devices - and the personal data you store on them - are protected against all the threats the Web can deliver.

Kaspersky Internet Security - multi-device 2014 is the easy-to-use, one-licence, multi-platform security solution that protects virtually any combination of PCs, Mac, Android smartphones and tablets… to give you:

Multi-Device Security - with award-winning protection that's optimised for each device
Flexible Protection - to let you 'mix and match' security to fit any combination of devices
Real-Time Protection - against all new and emerging malware and Internet threats
Anti-Theft Protection - to secure your data if your Android smartphone or tablet is lost or stolen

Kaspersky Internet Security - multi-device 2014 also includes Kaspersky Safe Browser for iOS, which helps to defend you against phishing websites and malicious links when you're using your iPhone and iPad. Kaspersky Safe Browser for iOS is available free of charge - for you to install on any number of your iOS-based devices.

Benefits:

Protecting all your connected devices- the one-licence, easy-to-use solution
Kaspersky Internet Security - multi-device 2014 gives you the freedom to enjoy the Internet to its full potential, on a range of devices. With just one licence, you can easily set up protection for the following:

- PCs
- Mac
- Android smartphones
- Android tablets

- iPhone and iPad devices (Kaspersky Safe Browser for iOS is available free of charge)

Delivering security you can 'mix and match' to suit the devices you use
Kaspersky Internet Security - multi-device 2014 is the convenient way to secure virtually any combination of your devices:

In addition, you can download Kaspersky Safe Browser for iOS - free of charge, onto any number of iPad or iPhone devices you own - to help defend you against phishing websites and malicious links. Because Kaspersky Safe Browser for iOS is a free download, it won't count as one of your devices - so, if you buy a five-device licence you'll be able to protect your choice of five PC, Mac or Android devices… and also download Kaspersky Safe Browser onto your iPad and iPhone devices.

Optimising protection, performance and usability for each device
PCs, Mac, Android tablets and smartphones all have different security requirements. In one simple, flexible security solution, Kaspersky Internet Security - multi-device 2014 provides:

Protection features that are optimised for each type of device
Security technologies that help to maintain performance levels on each device
Easy-to-use interfaces that are appropriate to each device

Providing real-time protection against all new and emerging malware and Internet threats
Whether you're using your PC, Mac, Android smartphone or tablet, Kaspersky Internet Security - multi-device 2014 ensures:

All applications and files that you open, save or download from the Web are immediately scanned.
Potential threats are monitored and analysed in real time - and dangerous actions are prevented before they can cause harm

Securing data on your missing Android device - with premium anti-theft protection
If your Android smartphone or tablet is lost or stolen, Kaspersky Internet Security - multi-device 2014 provides remotely-operated features to help:

Protect the personal information that's on your device - by blocking your device, wiping data from it, sounding an alarm and taking photos of unauthorised users
Find the location of your missing Android smartphone or tablet

Key Features:

Recognised for their world-class anti-malware and Internet security expertise, Kaspersky's research & development teams have developed a vast array of innovative features to secure every device that's protected by Kaspersky Internet Security - multi-device 2014:

- Windows-based PCs
- Mac
- Android smartphones and tablets
- iPhone and iPad devices. Kaspersky Internet Security - multi-device 2014 also includes Kaspersky Safe Browser for iOS, which helps to defend you against phishing websites and malicious links when you're using your iPhone and iPad.

Windows-based PC Protection:
Sophisticated computer malware and complex Internet threats can compromise the security of your PC and your valuable, personal information.

Kaspersky's award-winning security technologies protect your PC against all types of malware and Internet-based threats, including cybercrime attacks that try to steal your money or your identity.
Main features

- Anti-malware protection for PCs - against computer viruses, worms, Trojan viruses, spyware, rootkits, bots… and more
- Real-time, cloud-assisted protection against new and emerging malware and Internet threats

- Safe Money - adds another layer of security for your money when you're online banking or shopping
- Web protection - including anti-phishing and anti-spam protection, plus Kaspersky URL Advisor that checks for dangerous links
- Virtual Keyboard technology lets you use mouse clicks to enter passwords and other sensitive data - so it can't be intercepted by keyloggers or identity thieves
- Secure Keyboard - prevents keyloggers from accessing data you enter using your PC's physical keyboard
- Automatic Exploit Prevention - helps to prevent malware exploiting vulnerabilities in the operating system or applications
- Trusted Applications Mode - gives you the option of only running applications that have been assessed by Kaspersky and regarded as 'trusted'
- System Watcher - detects dangerous behaviour on your PC and enables rollback of most types of malicious action
- Optimised antivirus databases - help to minimise the impact on PC performance and reduce update times
- Protection against screen lockers - defends against Blocker Trojan viruses that may try to hold your system hostage
- Advanced Parental Control technologies - help to provide Internet safety for kids
- Optimised for Windows 8.1

Mac Protection

Because Mac is becoming increasingly popular, more cybercriminals are targeting Mac users - to steal their data, identities and money - and the volume of Mac malware continues to grow.

Kaspersky delivers real-time protection against Mac malware and guards your Mac against Internet-based threats and cybercrime.
Main features

- Anti-malware protection for Mac - against computer viruses, Trojan viruses, worms, spyware, bots… and more
- Malware protection - to prevent your Mac from passing PC malware to your family's, friends' or colleagues' PCs
- Real-time, cloud-assisted protection against new and emerging malware and Internet threats
- Advanced Parental Control technologies - help to keep children safe on the Internet
- Web protection - including enhanced anti-phishing, plus Kaspersky URL Advisor that checks for dangerous links
- Virtual Keyboard technology lets you use mouse clicks to enter passwords and other sensitive data - so it can't be intercepted by keyloggers or identity thieves
- File Antivirus - scans for the presence of malware when you open, save or run a file
- Email and download security - scans downloaded files, email text and attachments on http-based web pages
- Mac-style interface - for a familiar, intuitive-to-use interface
- Support for the latest Mac OS X versions
- Support for all Retina display requirements
- Optimised for minimal impact on the performance of your Mac

Android Smartphone and Tablet Protection

When you connect them to the Internet, your Android smartphone and tablet are just as vulnerable as your computer. In addition, it's all too easy to lose your phone or tablet - complete with all the personal information stored on it.

Kaspersky's latest mobile security technologies protect Android smartphones and tablets against malware and Internet security threats - and help to secure your personal information if your device is lost or stolen.

Main features

- Anti-malware protection for Android devices - against viruses, spyware, Trojan viruses, bots… and more
- Real-time, cloud-assisted protection against new and emerging Internet threats
- Anti-Theft Protection - to lock your device, wipe personal data from it and find its location
- Safe and secure web browsing - blocks dangerous and fraudulent links, including phishing websites
- URL checking within phone text messages - to tell you if a link is malicious or a phishing attempt

- Automatic or manual virus scan of any applications you download or install
- Call & Text Filter for phones - to help ensure you only receive the calls and text messages you want to receive
- Privacy Protection - to prevent people seeing details of your private communications, if they pick up your phone
- Optimised for minimal impact on the performance of your Android devices

Safe Browser for iOS
Criminals often set up phishing websites or fraudulent websites - in order to try to steal people's money or valuable information about their identity.

Kaspersky Safe Browser is available as a free download for your iPhone and iPad devices - to help you to avoid falling victim to phishing websites and to filter out malicious links. Furthermore, downloading Kaspersky Safe Browser onto your iOS-based devices won't count as one of your devices for your Kaspersky Internet Security - multi-device 2014 licence. If you buy a five-device licence you'll be able to protect your choice of five PC, Mac or Android devices… and also download Kaspersky Safe Browser onto your iPad and iPhone devices.
Main features

- Proactively detects fraudulent URLs
- Blocks phishing websites and fraudulent websites
- Protects against malicious links and inappropriate content
- Delivers enhanced defence - by receiving real-time information from the cloud
- Has been specifically designed for iPhone and iPad users
- Supports popular search engines - including Google, Bing, Yandex and Yahoo
