Microworld USB Foldable Keyboard Membrane

Product Overview

Microworld USB Foldable Keyboard Membrane - Stand-alone USB full keyboard that is flexible and light - for use with laptops and other devices.

Specifications

Overview Summary

Microworld Foldable Silicone Keyboard USB and PS2 109 Keys

The Microworld foldable silicone keyboard is a durable and flexible typing solution designed for users who need portability and resilience. Made from soft silicone material, this keyboard can be rolled or folded for easy storage, making it ideal for travel, mobile workstations, and environments where traditional keyboards are not practical.

With support for both USB and PS2 connections, this versatile keyboard works across a wide range of devices including laptops, desktops, and compatible systems. Its waterproof design and long key lifespan make it a reliable option for everyday use, even in challenging conditions.

Performance tier: Portable and durable everyday typing

Uses: travel typing, office work, industrial environments, educational use, portable computing setups

Features

Flexible and foldable design

The soft silicone construction allows the keyboard to be folded or rolled, making it easy to carry and store in bags without taking up much space.

Waterproof and durable

Designed to resist spills and dust, this keyboard is ideal for environments where protection against liquids and debris is important.

Dual connectivity support

ComX Computers

Product Specification Sheet

Compatible with both USB and PS2 interfaces, offering flexibility for use with modern and legacy systems.

Full size typing layout

- 109 standard keys for comfortable typing
- Suitable for everyday tasks and data entry
- Maintains familiar keyboard layout

Long lasting performance

Built for durability with a key life of up to 10 million keystrokes, ensuring reliable long term use.

Wide system compatibility

Works with multiple operating systems including Windows, Android, and Mac, making it suitable for various devices and platforms.

Description

The Microworld USB and PS2 foldable keyboard is designed for users who need a portable and tough typing solution. Its silicone construction not only provides flexibility but also protects the keyboard from everyday hazards such as spills, dust, and rough handling.

This keyboard is especially useful for mobile professionals, students, and technicians who work in environments where a standard keyboard may be too fragile or bulky. The ability to fold or roll the keyboard makes it easy to transport, while the slim design ensures it fits into most bags and cases.

With plug and play connectivity and support for multiple operating systems, this keyboard delivers convenience and reliability in one compact package. It is a practical choice for anyone needing a dependable keyboard on the go.
