Performance enhancement tools, including HDD health monitoring, ensure that your system remains responsive while maintaining excellent protection levels.

Performance tier: Premium security software

Uses: Online protection, safe browsing, identity protection, device performance optimization, secure password storage

Description

Kaspersky Plus Internet Security is designed to deliver a powerful combination of security, privacy, and performance features. With next generation threat detection, it protects you against a wide range of online dangers including viruses, ransomware, spyware, phishing sites, and network intrusions. Its triple layer protection system continuously scans, blocks, and removes threats in real time.

The included unlimited VPN ensures safe and private browsing by encrypting your online activity, while the integrated password manager keeps your login credentials securely stored and automatically accessible when needed. The software also features performance tools to help maintain system responsiveness, including HDD health monitoring to prevent unexpected drive failures.

Whether you browse, stream, work, shop, or bank online, Kaspersky Plus Internet Security provides a strong security foundation across up to 3 devices for a full year.
