Specifications

Features:

True Color at Wide Angles
LG Monitor with IPS technology highlights the performance of liquid crystal displays. Response times are shortened, color reproduction is improved, and users can view the screen at wide angles.

Immersive Experience
This display has slim bezel on three sides and doesn't interfere with dazzling precision, which allows you to create an optimized work environment through convenient tilt adjustment.

Comfortable Workplace
Its convenient tilt adjustments with clean uni-body design allow you to create an optimized work environment.

Improved Visual Comfort
To help lessen eye fatigue and provide eye comfort while reading documents on a monitor, Reader Mode adjusts color temperature and luminance similar to reading a paper book.

Care for Eyes
Flicker Safe reduces invisible flickering on the screen, which helps reduce eye strain. It provides a comfortable working environment for a long time.

Easier User Interface
You can customize the workspace by splitting the display or adjusting basic monitor options with just a few mouse clicks.

Fluid and Rapid Motion
With AMD FreeSync™ technology, gamers can experience seamless, fluid movement in hi-resolution and fast-paced games. It virtually reduces screen tearing and stuttering.

React Faster to Opponents

Reduce input lag with Dynamic Action Sync so it helps gamers catch critical moments in real-time.

Attack First in Dark

Black Stabilizer helps gamers to avoid snipers hiding in the darkest places and quickly escape situations when the flash explodes.

Better Aim

Target point is fixed in the center to enhance shooting accuracy.
