Specifications

Features:

WQHD Image Quality
With a screen resolution of 3440x1440 pixels-approximately 2.4 times the density of Full HD-the SJ55W delivers razor-sharp images. And with more pixels to display content, you can view more of your webpages and documents at once without scrolling or zooming out.

Seamless Multi-tasking
With its 34" ultra-wide screen and 21:9 WQHD resolution, the SJ55W provides all the workspace you need to comfortably multi-task on a single screen. Whether you're working on documents, playing games, or watching movies, you'll enjoy all your content in superbly detailed WQHD quality.

PBP and PIP
Picture-by-Picture (PBP) function displays input from two sources side-by-side at their native resolution. Optimize your multi-tasking further with Picture-in-Picture (PIP), which lets you resize the second source to up to 25% of the screen and position it anywhere.

Smoother Gameplay
AMD FreeSync synchronizes the refresh rate of your graphics card and monitor to reduce image tear and stutter. Low Input Lag Mode minimizes the delay between mouse, keyboard, or joystick input and onscreen response for a seamlessly smooth gaming experience.

Stylish and Practical
The SJ55W's slim panel, elegant Y-stand, and metallic bezel bring quality and style to your workplace or home. The VESA-compatible mount allows precision positioning while DP and HDMI ports offer multiple connectivity options, making the SJ55W as practical as it is stylish.
