LGMON-L1942S

LG 19" LCD 1280x1024 8000:1 5ms D-sub

Product Overview

LG 19" LCD 1280x1024 8000:1 5ms D-sub

Specifications

Overview:
19" standard LCD Monitor, Best solution for Office and education users, 5ms Response time

Key Features:
4:3 in Wide
With the 4:3 in Wide Funtion, no more distorted images Enjoy original 4:3 images with an LG Wide Monitor When Playing a 4:3 Format ame Real 4:3 images look clear Easy to control games accurately If you Use a PC that doesn't Support Wide Aspect ratio Distorted characters and non-life-like scenes

Photo Effect
You can easily change an image's tone & color like in Photoshop program (Blur / Sepia / Monochrome Effect) You can give the photo shop effect to all kinds of UCC (Moving picture still cut, etc) with a touch of a fun key

DFC (Digital Fine Contrast ratio) 10000:1
Experience clear and sharp images on an LG FLATRON LCD Colors literally jump off the screen Ideal for Movies Optimized for maximum image brightness - Suitable for moving images with various brightness levels. e.g. movies, cartoons, games, photos, etc. Enjoy clear, crisp and bright images Advanced Dark Color Control Displays top-quality dark images - Images remain clear even on dark backgrounds Superior range of dark colors Automatically displays perfect black tones Clear Vision As real as it gets - As if looking at a real object Reduces eye strain when looking at small image Technology Behind DFC 1st Step: Analyze input content and automatically recognizes the need to boost contrast 2nd Step: Activate contrast enhancer control to boost contrast 3rd Step: Display an improved digital image with optimal contrast

ez Zooming
Switch resolution modes at the touch of a button (Screen resolution reduces by one level)

Sound
Press a POWER button to turn on the screen with a pleasant sound

2ms (GTG) Lightening Fast Response Time

With its speedy 2 ms response time, LG FLATRON LCD Monitors provide crisp images whilst minimizing image distortion Your video games have never looked so good
