Specifications

About this product

The Mecer LKCP-0093 Note Guard Security Cable is a durable 1.8m anti-theft cable lock with a 4-dial combination mechanism, designed to secure compatible laptops and PCs to desks or fixed objects without requiring keys.

Overview Summary

Mecer LKCP-0093 Note Guard Security Cable

The Mecer LKCP-0093 Note Guard Security Cable provides a simple and effective way to help protect compatible laptops and desktop PCs from opportunistic theft. Featuring a strong 1.8 meter steel cable and an easy-to-use 4-dial combination lock, it secures your device to a desk, table, or other fixed object without the need for keys.

Designed for business, education, and personal use, this new security cable is ideal for offices, schools, libraries, reception areas, co-working spaces, and other supervised public environments. Its compact design, keyless operation, and durable construction make it a practical everyday security solution.

Performance tier: Essential Physical Security

Uses: Laptop security, desktop PC security, office workstations, classrooms, libraries, public access computers, reception areas, travel, co-working spaces

Description

The Mecer LKCP-0093 Note Guard Security Cable helps reduce the risk of laptop or desktop computer theft by securely attaching compatible devices to a fixed object. Its durable steel cable provides reliable physical protection while allowing enough length for convenient workstation placement.

The integrated 4-dial combination lock eliminates the need for keys and allows users to create their own security code from up to 10,000 possible combinations. This makes it an excellent solution for shared offices, classrooms, libraries, reception

counters, and other supervised environments where equipment requires additional protection.

Compact and easy to carry, the cable lock is also suitable for professionals who regularly travel or work in shared office spaces. While it provides an effective theft deterrent, higher security environments may benefit from additional supervision or a keyed security lock.

Features

FAQ

How does the Mecer LKCP-0093 secure a laptop?

The security cable attaches a compatible laptop or desktop PC to a fixed object using a steel cable and combination lock.

Does this security cable require a key?

No. The LKCP-0093 uses a 4-dial combination lock, eliminating the need to carry or replace keys.

How many possible lock combinations are available?

The 4-dial mechanism provides up to 10,000 possible combinations.

Where is this security cable best used?

It is ideal for offices, schools, libraries, reception areas, co-working spaces, and other supervised public environments where laptops require additional protection.

Is this suitable for high risk locations?

The cable provides an effective theft deterrent for supervised environments. For very high risk areas, a keyed security lock and additional supervision will provide greater protection.
