SAMSUNG LED 20" Monitor

Product Overview

SAMSUNG LED 20" Monitor, (SA300) MEGA DCR (1000:1),1600*900, 5ms,250cd/m2

Specifications

Features:

Breakthrough Picture Quality with LED Technology
Samsung's LED monitors deliver a visually stunning picture quality that leaves you speechless. Just as you've seen in Samsung LED TV's, our LED monitors make colors more rich and the action more real than you've dreamt possible. Let the story come to life with vivid colors and crystal-clear detail.

Consume Less Energy and Run Cooler
Engineered with ecologically responsible consumers and businesses in mind, Samsung's LED technology reduces power consumption up to 40%--making our LED displays much more efficient than conventional LCD monitors. Your monitor will stay cool to the touch, even after a long day of hard work. Lower your monitor's power consumption without sacrificing performance with an LED backlight.

Ultra Slim-Design
Remember when you replaced your bulky CRT monitor with a slimmer LCD monitor? The next leap forward is here. LED

technology enables striking, ultra-thin displays. As slim as 16.5 mm, LED monitors add elegance to your desk. They are also very lightweight, making them easy to lift and move.

Perfect from Every Angle with MagicAngle
Ever look at your monitor from an angle? Did the display look washed out, distorted or just hard to see? Samsung's MagicAngle technology improves the off-angle viewing performance of the monitor so that it maintains superb image quality even if you are leaning back, lying down, or have the monitor mounted on the wall. Activating MagicAngle is simple. Just go into the monitor menu and select your screen position from one of four monitor angle settings. Once set, you can enjoy images in full clarity and color depth no matter what position the monitor is facing.

Fast Response Time
With a response time of 5ms, you can be sure that your monitor will perform perfectly, even in the fastest moving scenes. This stunning, seamless motion imaging presents movies, games, and internet streamed content with precision and without the motion judder, blurring, and ghosting that can occur on a slower monitor, allowing you to enjoy a completely immersive viewing experience.

Rated EPEAT Gold Standard
By meeting and exceeding the highest green standards, this product has been rated GOLD by the EPEAT. The rating is based on the environmental impact in a complete product lifecycle, so consumers can easily match high-performance electronics with green benefits. Earning this top rating means this product surpasses standard green criteria by at least 75%.

Specifications:

Design	
Cabinet Style	High Glossy Black
Display	
Screen Size	20"
Resolution	1600x900
Brightness	250cd/m2
Response Time	5ms (GTG)
