Specifications

Overview Summary:

Upgrade your home connectivity with the Cudy AC1200 Mesh Wi-Fi System, the perfect solution for South African households seeking reliable and fast internet access. This compact dual-band router supports up to 128 devices, making it ideal for modern homes filled with smartphones, laptops, smart TVs, and other connected gadgets. With its easy setup process and automatic port configuration, getting your network running has never been simpler.

Designed for everyday browsing, streaming, and video calls, this Wi-Fi 5 system delivers consistent performance across two frequency bands to reduce congestion. Whether you are working from home or enjoying entertainment in the living room, the Cudy M1200 ensures a stable connection throughout your space. Its small footprint allows it to blend seamlessly into any decor without taking up valuable desk or shelf space.

Secure your online experience today with this efficient mesh system that grows with your needs. Buy now from our store and enjoy fast, reliable wireless coverage for your entire household without the hassle of complex installations. Shop now to transform your home network performance.

Performance tier:Mid-Range Home Network Solution

Uses:Home networking, streaming media, video conferencing, smart home device connectivity, general internet browsing

Overview:

The Cudy AC1200 Mesh Wi-Fi System - 1 Pack is designed for households that want a more capable wireless network than a basic router can offer. Built on the Wi-Fi 5 standard with an AC1200 speed class, it gives everyday browsing, streaming and video calls a solid wireless backbone. As a mesh system, it is a sensible starting point for anyone upgrading their home network in Cudy's M1200 range.

Description:

This single-unit mesh solution offers reliable dual-band Wi-Fi 5 coverage with the capacity to connect up to 128 devices simultaneously. Its compact design and lightweight build make it easy to place anywhere, while the included Auto WAN/LAN Ethernet ports provide flexible wired connectivity for smart TVs or desktop computers without complex configuration.

Tired of a crowded network slowing everyone down This dual-band system works across two Wi-Fi bands, helping you spread your connected devices across the network instead of squeezing them onto a single one. With support for up to 128 connected devices, it is well suited to the modern home where phones, laptops, smart TVs and other gadgets all compete for the same connection.

Features:

Key Benefits and Capabilities

The M1200 model delivers dependable performance for everyday tasks. It supports seamless mesh networking to expand your signal reach and ensures that wired devices can connect effortlessly through its flexible ports.

- Dual-band Wi-Fi 5 technology handles high-demand activities like streaming and video calls smoothly
- Supports up to 128 connected devices for busy, device-heavy households
- Two Auto WAN/LAN 10/100 Mbps RJ45 ports allow flexible wired connections without port confusion
- Compact dimensions of 8.5 x 8.5 x 8.65 cm fit discreetly on shelves or desks
- Weighs just 0.1355 kg for easy placement and minimal visual clutter

ComX Computers

Product Specification Sheet

Not everything belongs on Wi-Fi, and this unit recognises that. It provides 2 x 10/100 Mbps RJ45 Ethernet ports with Auto WAN/LAN, so you can connect to your internet source or plug in wired equipment without worrying about which port does which job. The supplied Ethernet cable means you can start connecting straight out of the box.

Measuring just 8.5 x 8.5 x 8.65 cm and weighing 0.1355 kg, the M1200 is small enough to sit discreetly on a shelf or desk without taking over the room. The box includes the power adapter, an Ethernet cable and an installation guide, giving you everything needed to get your mesh Wi-Fi system up and running with minimal fuss.

Technical Specifications:

- Colour: White
- Product Weight: 0.1355 kg
- Dimensions (L x W x H): 8.5 x 8.5 x 8.65 cm
