Specifications

About this product

The**FSP M221-BA ATX Mid Tower Gaming Chassis**is a black gaming PC case designed for custom desktop builds, supporting ATX and Micro-ATX motherboards. Featuring RGB lighting, one included cooling fan, graphics card clearance up to 317 mm and CPU cooler clearance up to 163 mm, it provides a practical foundation for building a gaming or everyday performance PC. With convenient front connectivity, including 1 x USB 3.0 and 2 x USB 2.0 ports, the FSP M221-BA combines essential connectivity with a stylish gaming design. Buy the FSP M221-BA gaming chassis online in South Africa today and build your custom gaming PC.

Overview Summary

FSP M221-BA ATX Mid Tower Gaming Chassis - Black

The FSP M221-BA is an ATX mid tower gaming chassis designed to accommodate custom desktop computer builds. Its motherboard compatibility includes standard ATX and Micro-ATX formats, providing flexibility when selecting components for a new gaming or general-purpose PC. The black exterior and integrated RGB lighting give the chassis a distinctive gaming appearance.

Designed to accommodate a range of desktop components, the chassis supports graphics cards up to 317 mm in length and CPU coolers up to 163 mm in height. It includes one cooling fan and provides front-panel connectivity through 1 x USB 3.0 and 2 x USB 2.0 ports for connecting compatible peripherals and USB devices.

With its mid tower form factor, component clearance and essential connectivity, the FSP M221-BA offers a practical starting point for budget-conscious gaming PC builders, home computer users and custom desktop installations.

Performance tier: Entry-level gaming chassis

Uses: Custom gaming PC builds, home desktop computers, everyday computing, office PCs, multimedia desktop systems

Description

The FSP M221-BA ATX Mid Tower Gaming Chassis is designed for users who want a practical enclosure for assembling a custom desktop computer. Its mid tower configuration provides compatibility with ATX and Micro-ATX motherboards, making it suitable for a variety of gaming, home and office computer builds.

Finished in black, the chassis features RGB lighting to give a gaming setup a more distinctive appearance. Its design combines everyday functionality with space for important desktop components, making it a suitable choice for users assembling a new PC or upgrading their existing computer enclosure.

Graphics card compatibilityis an important consideration when selecting a gaming chassis. The FSP M221-BA accommodates graphics cards up to 317 mm long, allowing builders to select compatible graphics hardware within this maximum clearance. The chassis also supports CPU coolers up to 163 mm in height, providing room for compatible air cooling solutions.

For cooling, the chassis comes supplied with one fan. Additional cooling requirements should be considered according to the components being installed and the manufacturer's supported fan configurations.

Convenient front connectivitymakes connecting everyday accessories straightforward. The front I/O includes one USB 3.0 port and two USB 2.0 ports, allowing users to connect compatible USB peripherals, storage devices and accessories.

Whether you are assembling an entry-level gaming computer, a home desktop or an everyday workstation, the FSP M221-BA provides a functional mid tower foundation with RGB lighting and practical component clearance.

Features

The FSP M221-BA combines essential PC building compatibility, RGB lighting and convenient front connectivity in a black mid tower gaming chassis.

- ATX mid tower design: Provides a practical enclosure for custom desktop computer and gaming PC builds.
- ATX motherboard support: Compatible with standard ATX motherboards.
- Micro-ATX motherboard support: Also accommodates compatible Micro-ATX motherboards.
- RGB lighting: Integrated RGB lighting adds colour and visual appeal to your gaming setup.
- Graphics card clearance: Supports graphics cards with a maximum length of 317 mm.
- CPU cooler clearance: Accommodates compatible CPU coolers up to 163 mm in height.
- Included cooling fan: Supplied with one fan as part of the chassis configuration.
- USB 3.0 connectivity: Includes one front USB 3.0 port for compatible devices.
- USB 2.0 connectivity: Includes two front USB 2.0 ports for additional peripheral connections.
- Black finish: Provides a clean, understated appearance suitable for gaming and desktop environments.
- Mid tower dimensions: Measures 35.8 x 20.8 x 43.2 cm for desktop PC installations.

Command your build with the FSP M221-BA gaming chassis
The FSP M221-BA ATX Mid Tower Gaming Chassis is made for the South African gamer who wants a striking, capable home for a new PC build. Finished in black with RGB lighting, this gaming chassis gives your components a stage worth showing off. Its mid tower layout supports ATX and Micro-ATX motherboards, so you can choose the board that fits your plans and your budget.

Room for the hardware that wins
Tired of discovering that your dream graphics card will not fit The M221-BA accepts GPUs up to 317 mm in length, giving you the freedom to pair your build with a powerful card. There is also clearance for CPU coolers up to 163 mm in height, so you can fit a substantial air cooler to keep your processor under control during long sessions. Check your parts against these two figures before you buy and build with confidence.

RGB lighting and a fan ready from the start
Dominate the room as well as the leaderboard with built-in RGB lighting that adds colour and personality to your desk or battle station. The chassis also includes 1 fan, so your build starts with a fan already provided for the case. It is a practical foundation that you can build on as your system grows.

Front connections within easy reach
Plug in without crawling behind your PC. The front I/O offers USB 3.0 x 1 and USB 2.0 x 2, giving you quick access for a headset dongle, a flash drive, a controller or a mouse. At 35.8 x 20.8 x 43.2 cm and 3.7 kg, this mid tower gaming case keeps a manageable footprint for a desk or the floor beside it.

FAQ

Which motherboards are compatible with the FSP M221-BA chassis?

The FSP M221-BA supports ATX and Micro-ATX motherboards. Check your motherboard dimensions and mounting compatibility before installation.

Is the FSP M221-BA suitable for gaming PC builds?

Yes. It is designed as a gaming PC chassis and supports compatible ATX and Micro-ATX motherboards, graphics cards up to 317 mm long and CPU coolers up to 163 mm high.

Does the FSP M221-BA include RGB lighting?

Yes. The FSP M221-BA features RGB lighting to enhance the appearance of your gaming computer setup.

How many cooling fans are included with the FSP M221-BA?

The FSP M221-BA includes one cooling fan. Additional cooling requirements should be checked against the manufacturer's supported configurations.

What is the maximum graphics card length supported?

The chassis supports graphics cards up to 317 mm in length. Check the dimensions of your graphics card before purchasing to ensure compatibility.

What is the maximum CPU cooler height?

The maximum supported CPU cooler height is 163 mm. Your selected CPU cooler must fit within this clearance.

What USB ports are available on the FSP M221-BA?

The front I/O panel provides one USB 3.0 port and two USB 2.0 ports for connecting compatible USB accessories and peripherals.

What are the dimensions of the FSP M221-BA gaming chassis?

The chassis measures 35.8 cm in depth, 20.8 cm in width and 43.2 cm in height.

Is the FSP M221-BA suitable for office and home computers?

Yes. Its ATX and Micro-ATX motherboard support makes it suitable for compatible home desktop computers, office PCs and general-purpose custom computer builds.

Does the FSP M221-BA include a power supply?

A power supply is not included in the confirmed product contents. A compatible power supply must be selected separately for your PC build.
