MC122-2

Midea Carbon Fiber Water Purifier System

Product Overview

Midea Carbon Fiber Water Purifier System - 0.1~0.4MPa Working Pressure, 2 Litres Per Minute High Speed Initial Flow Rate, Quick Connection Type Adapter and Filter, Patented Quick Release Filter System, Retail Box

Specifications

About this product

The Midea Carbon Fiber Water Purifier System provides a convenient water filtration solution with a 0.1-0.4MPa working pressure range and a high-speed initial flow rate of up to 2 litres per minute. It features a patented quick release filter system and quick connection adapter and filter design for convenient installation and filter replacement. Buy now from our website for a practical home water purification solution.

Overview Summary

Midea Carbon Fiber Water Purifier System

The Midea Carbon Fiber Water Purifier System is designed to provide convenient water filtration with a high-speed initial flow rate of up to 2 litres per minute. Its 0.1-0.4MPa working pressure range makes it suitable for compatible household water supply applications within the specified pressure range.

The system features a patented quick release filter system together with a quick connection type adapter and filter. This design is intended to make filter installation and replacement more convenient, helping simplify routine water purifier maintenance.

Performance tier: Convenient household water filtration

Uses: Household water filtration, drinking water preparation, kitchen water purification

Description

The Midea Carbon Fiber Water Purifier System is designed for convenient water filtration in compatible household applications. It combines a carbon fiber filtration system with a quick connection type adapter and filter to provide a practical solution for users looking for straightforward water purification.

The purifier operates within a specified working pressure range of 0.1-0.4MPa and provides a high-speed initial flow rate of up to 2 litres per minute. This flow rate is designed to provide convenient access to filtered water while maintaining the specified

operating conditions of the system.

A key feature of this Midea water purifier is its patented quick release filter system. The quick release design is intended to simplify filter replacement and routine maintenance, while the quick connection adapter and filter help make installation more convenient.

With its compact filtration-focused design and convenient filter replacement system, the Midea Carbon Fiber Water Purifier System is a practical choice for household water filtration where the supplied water pressure falls within the specified 0.1-0.4MPa operating range. Buy for quick delivery and convenient home water filtration.

Features

The Midea Carbon Fiber Water Purifier System combines convenient installation features with a quick release filter design for practical household water filtration.

- Carbon fiber water purification system
- 0.1-0.4MPa working pressure range
- High-speed initial flow rate of up to 2 litres per minute
- Patented quick release filter system
- Quick connection type adapter and filter
- Designed for convenient filter replacement
- Suitable for compatible household water filtration applications

What's in the Box

- Midea Carbon Fiber Water Purifier System
- Quick connection type adapter
- Filter
- Retail box

Specifications

- Brand: Midea
- Product type: Water purifier system
- Filtration type: Carbon fiber
- Working pressure: 0.1-0.4MPa
- Initial flow rate: Up to 2 litres per minute
- Filter system: Patented quick release filter system
- Connection type: Quick connection type adapter and filter
- Application: Household water filtration
- Packaging: Retail box

FAQ

What is the Midea Carbon Fiber Water Purifier System?

The Midea Carbon Fiber Water Purifier System is a household water filtration system featuring a carbon fiber filter, quick connection adapter and patented quick release filter system.

What working pressure does the Midea water purifier require?

The specified working pressure range is 0.1-0.4MPa.

What is the initial flow rate of the Midea water purifier?

The system has a high-speed initial flow rate of up to 2 litres per minute.

Does the Midea water purifier have a quick release filter?

Yes. The purifier features a patented quick release filter system designed to make filter replacement more convenient.

Does the Midea water purifier include a quick connection adapter?

Yes. The supplied product information specifies a quick connection type adapter and filter.

Where can the Midea Carbon Fiber Water Purifier System be used?

The system is intended for compatible household water filtration applications operating within its specified 0.1-0.4MPa working pressure range.

What type of filter does this Midea water purifier use?

The supplied product information identifies the filtration system as a carbon fiber water purifier with a patented quick release filter system.
