

ME-CD41626V18

Corsair Value select 16Gb DDR4-2666 (pc4-21300) CL18 1.2v Desktop Memory Module

Product Overview

Corsair CMV16GX4M1A2666C18 value select, 16Gb - support Intel XMP (eXtreme Memory Profiles), DDR4-2666 (pc4-21300), CL18, 1.2v - 288pin

Specifications

About this product

The Corsair Value Select CMV16GX4M1A2666C18 is a 16GB DDR4 desktop memory module with a 2666MHz speed rating, CL18 latency, 1.2V operating voltage and 288-pin DIMM design. It provides a practical memory upgrade for compatible desktop computers, supporting everyday computing, office applications, multitasking and general system performance. Buy this Corsair 16GB DDR4 RAM module from our website for a reliable memory upgrade.

Overview Summary

Corsair Value Select 16GB DDR4 2666MHz Memory Module is a desktop RAM module designed to provide additional system memory for compatible computers. The module offers 16GB capacity in a single 1 x 16GB module, with a tested speed of up to 2666MHz and tested latency of 18-18-18-43.

With a 1.2V tested voltage, PC4-21300 speed rating and standard 288-pin DIMM format, this Corsair memory is suited to compatible desktop systems using DDR4 memory. It is designed for standard computing applications such as office software, multitasking and general desktop use.

Performance tier:Mainstream

Uses:Desktop memory upgrade, office computing, multitasking, general computing, compatible DDR4 desktop systems

Overview

Corsair built its reputation on performance memory that shines in the most demanding computing situations: extreme gaming and high-transaction processing environments. But not all computers are put to such extreme usage. So we brought the same reliability, testing and Corsair quality to a line of memory designed to support standard computing situations such as popular office applications. Now it's one of our most popular memory lines.

Description

ComX Computers

Product Specification Sheet

The Corsair CMV16GX4M1A2666C18 Value Select is a 16GB DDR4 desktop memory module designed for compatible systems requiring a standard 288-pin DIMM. It provides a tested speed of up to 2666MHz and a tested latency of 18-18-18-43, making it suitable for a broad range of everyday desktop computing requirements.

The single-module 1 x 16GB configuration provides 16GB of system memory from one DIMM. This makes the module suitable for compatible desktop computers that require additional memory capacity for office applications, multitasking, web-based workloads and general computing.

Corsair specifies a tested voltage of 1.2V and a PC4-21300 speed rating for this module. The Value Select series is designed for standard computing environments and is backed by Corsair's stated lifetime warranty.

Compatibility should be checked against the motherboard and processor memory specifications before installation. Corsair lists compatibility with Intel 100, 200, 300, 400, 500 and 600 series platforms for this memory module.

Features

The Corsair Value Select CMV16GX4M1A2666C18 combines 16GB capacity with DDR4 2666MHz performance in a single desktop DIMM for compatible systems.

- 16GB memory capacity: Provides 16GB of system memory in a single 1 x 16GB module.
- DDR4 technology: Designed for compatible desktop systems using DDR4 memory.
- 2666MHz tested speed: Offers a tested speed of up to 2666MHz.
- PC4-21300 rating: Uses a PC4-21300 speed rating.
- CL18 latency: Tested latency is 18-18-18-43.
- 1.2V voltage: Corsair specifies a tested voltage of 1.2V and SPD voltage of 1.2V.
- 288-pin DIMM: Uses a standard 288-pin desktop memory module format.
- Broad Intel platform compatibility: Corsair lists Intel 100, 200, 300, 400, 500 and 600 series compatibility.
- Value Select series: Designed for standard computing requirements including popular office applications.

Ultra Stable Memory from CORSAIR - the Leader in Performance Memory Solutions

CORSAIR built its reputation on performance memory that shines in the most demanding computing situations: extreme gaming and high-transaction processing environments. But not all computers are put to such extreme usage. So we brought the same reliability, testing and CORSAIR quality to a line of memory designed to support standard computing situations such as popular office applications. Now it's one of our most popular memory lines. Backed with a lifetime warranty, it is memory you can rely on.

What's in the Box

- 1 x Corsair Value Select 16GB DDR4 2666MHz memory module

Specifications

Memory Size	16GB (1 x 16GB)
Tested Latency	18-18-18-43
Tested Speed (Up To)	2666
Tested Voltage	1.2V
SPD Voltage	1.2V
Speed Rating	PC4-21300 (2666MHz)
SPD Speed	2666MHz
SPD Latency	18-18-18-43
Memory Series	VALUE SELECT

Package Memory Pin	288
Weight	0.031kg
Fan Included	No
Memory Compatibility	Intel 100 Series, Intel 200 Series, Intel 300 Series, Intel 400 Series, Intel 500 Series, Intel 600 Series
Memory Detail Compatibility	Intel 100 Series, Intel 200 Series, Intel 300 Series, Intel 400 Series, Intel 500 Series, Intel 600 Series
Memory Type	DDR4

FAQ

What is the capacity of the Corsair CMV16GX4M1A2666C18?

The module has a 16GB memory capacity supplied as 1 x 16GB DDR4 desktop memory module.

What speed is this Corsair DDR4 memory?

The CMV16GX4M1A2666C18 has a tested speed of up to 2666MHz and a PC4-21300 speed rating.

What is the latency of this 16GB Corsair RAM module?

The tested latency is 18-18-18-43, commonly identified as CL18.

What voltage does this Corsair RAM use?

The tested voltage and SPD voltage are both 1.2V.

Is the Corsair CMV16GX4M1A2666C18 suitable for laptops?

No. This module uses a 288-pin desktop DIMM format. Laptop memory generally uses a different physical module format, so this product should be installed only in a compatible desktop system.

How many memory modules are included?

One 16GB memory module is included, configured as 1 x 16GB.

Which Intel platforms does Corsair list as compatible?

Corsair lists Intel 100, 200, 300, 400, 500 and 600 series platforms as compatible with this memory module.

Is this Corsair memory suitable for office computers?

Yes. Corsair describes the Value Select series as being designed for standard computing situations such as popular office applications.

Should compatibility be checked before installing this RAM?

Yes. The motherboard and processor should support DDR4 memory and the module's capacity and speed before installation.
