Product Overview

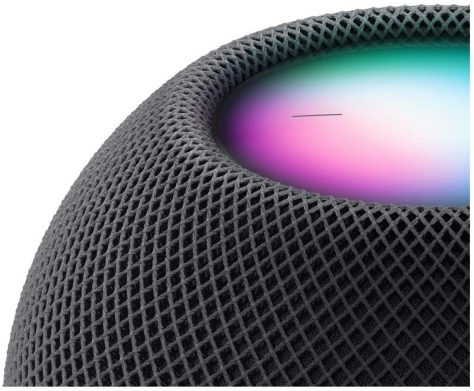

Apple HomePod Mini - Blue, Acoustically Transparent fabric, Computational audio for Real-Time tuning, Four-microphone design for far-field Siri, Multiroom audio with AirPlay 2, Stereo pair capable, Full-range Driver and Dual passive radiators

Specifications

Features:

HomePod mini is designed to fit anywhere in the house. Its elegant shape is wrapped in a perfectly seamless mesh fabric thats virtually transparent to the sound passing through it. A backlit touch surface on the top provides quick control.

With multiple HomePod mini speakers placed around the house, you can have a connected sound system for your whole home. Ask Siri to play one song everywhere or, just as easily, a different song in each room.

Having powerful audio everywhere in the house couldn' t be simpler and each HomePod mini gives you total control, no matter where you are. HomePod mini also works with your Apple devices for features like Intercom, letting you quickly communicate by voice.

Pick up an incoming call from your iPhone, kick back with your favorite shows on Apple TV, listen to music on your Mac - HomePod mini works effortlessly with all your Apple devices and experiences to take your sound to the next level. You can even create a stereo pair - two HomePod mini speakers paired in the same room create left and right channels for fully immersive audio.

If youre enjoying music or a podcast and have to head out, you can continue to listen on your iPhone without missing a beat. Hand it off simply by bringing your iPhone close to HomePod mini. Youll experience the feeling of your iPhone and HomePod mini connecting virtually as the sound transfers.

Personalized listening suggestions will also automatically appear on your iPhone when you hold it next to HomePod mini. Youll have instant control at your fingertips without having to unlock your iPhone.

Siri is your do-it-all intelligent assistant that puts HomePod mini at the center of your familys activities. And with multiple HomePod mini speakers around the house, it's easy to call on Siri from anywhere. HomePod mini and Siri can do even more by seamlessly connecting to your iPhone, and Apple Music Voice gives you access to every song in the catalog all with just your voice.

Siri can recognize the voices of up to six different family members on HomePod mini - and create a personalized experience for each person. So the music Dad hears when he asks for something hed like is totally different from what the kids hear when they ask. And with Personal Requests, Siri can recognize a particular voice and relay that persons information from iPhone apps like Messages, Calendar, Reminders, and Contacts. And of course, HomePod mini keeps your information private and secure.

With more than one HomePod mini in the house, you can easily communicate with your family members by voice using Intercom. Ask Siri to send your message to the whole house or to individual rooms - and everyone can easily respond.
