Product Overview

Apple iPAD Mini 4, 7.9" (diagonal) LED-backlit Multi-Touch display, A8 chip with 64-bit architecture, Wi-Fi (802.11a/b/g/n/ac); dual band (2.4GHz and 5GHz); HT80 with MIMO, 128GB, Silver

Specifications

Overview:

There's more to mini than meets the eye. iPad mini 4 puts uncompromising performance and potential in your hand. It's thinner and lighter than ever before, yet powerful enough to help you take your ideas even further.

Features:

Ridiculously light. Seriously thin.
iPad mini 4 puts everything you love about iPad into an incredibly sleek and portable design. So you can enjoy FaceTime calls with friends or get work done, wherever and whenever you want.

Power that's anything but mini.
iPad mini 4 is powered by an A8 chip with second-generation 64-bit desktop-class architecture that can handle even your most demanding apps. Whether you're editing a video, browsing photos, or both, your experience will be smooth and seamless. All while enjoying up to 10 hours of battery life.

Two amazing cameras. Cleverly disguised as an iPad.
The camera in iPad mini 4 delivers advanced optics, an improved sensor and an Apple-designed image signal processor. It also includes handy features like panorama, time-lapse video, slo-mo, and burst and timer modes. The front-facing FaceTime HD camera has been redesigned too, with a refined sensor and larger pixels for even better low-light performance. The upshot? All your photos and videos - and video calls and selfies - look incredibly vivid.

Advanced security. Right at your fingertip.
iPad mini 4 uses Touch ID technology to turn your fingerprint into the perfect unforgettable password. So you can unlock your device with just one touch and keep your personal data secure, even if you share your iPad with someone else. Touch ID also lets you make secure purchases in iTunes and the App Store. And with Apple Pay, you can make purchases within your favourite participating apps and on the web quickly, conveniently and securely.

Fast wireless connectivity.
iPad mini connects to fast Wi-Fi and mobile networks, so you can download content, browse the web and share documents from virtually anywhere. When you're not near a Wi-Fi hotspot, the Wi-Fi + Cellular model connects you to fast mobile data networks around the world.2 And with Apple SIM, you can choose a plan quickly and easily in over 180 countries and regions straight from your device.

iOS 11 and iPad. Made to do more together.
iPad mini 4 runs iOS 11, our most advanced, intuitive and secure mobile operating system yet. With enhanced apps and features like the new Dock, Drag and Drop, multitasking, Slide Over, Split View and Picture in Picture, iOS 11 lets you multitask in powerful yet simple ways. Whether you're checking messages while answering email or creating a presentation while watching the big match, iOS 11 helps you get more out of iPad than ever before.

Apps designed for iPad. And everything you want to do with it.
iPad mini 4 comes with powerful built-in apps for the things you do every day, like surfing the web, checking email, editing movies and photos, writing reports and reading books. And there are even more incredible apps on the App Store designed to take advantage of its Retina display (instead of simply stretching out iPhone apps). So whether it's photography, gaming, travelling or managing your finances, you'll find an app that will help you do it better.

Covers made for iPad mini 4. Colours that match everything else.
The iPad mini 4 Smart Cover protects your device everywhere you take it. Designed to be paired, the Smart Cover attaches to the front of your device, providing advanced protection in a range of gorgeous colours.

Designed to have a big impact on the world. Not the environment.
We're always thinking about the impact our products have on the world. And we know that impact continues after the end of a product's useful life. That's why nearly every Apple product is made from highly recyclable materials like aluminium, and why we go to great lengths to exclude harmful toxins from our components. iPad mini 4 is a perfect example. The aluminium enclosure is highly recyclable. And every iPad mini is free of brominated flame retardants (BFRs) and polyvinyl chloride (PVC). In fact, Apple has one of the strictest BFR-free and PVC-free standards in the industry. And we expect the same from our suppliers. So we actually disassemble our products into individual components and materials in our Cupertino lab. Then we test those components using a variety of methods, including X-ray fluorescence spectroscopy and ion chromatography. We do this to ensure that every product we make meets our environmental standards.
