Coolermaster MM830 Black Gaming Mouse

Product Overview

Cooler Master MM830 Gaming Mouse, DPI: 24000, Tracking speed: 250 ips/50g, Hidden Dpad with 4 buttons, Colour: Black

Specifications

Overview:

Control is the name of the game with the ergonomic MM830 gaming mouse. We pack this top-of-the-line gaming mouse with all the beefy specs and high-performance features you need to secure a flawless victory. That includes the standards like ultra-precise optical sensor and supremely durable housing and buttons - but we've added even more, like a customizable OLED and integrated D-pad for fast access to your most vital skills. Flashy and full-featured, the MM830 is the weapon of choice for those who want to carry their team to victory.

Features:

CHANGE THE GAME WITH JUST YOUR THUMB
Keep your most vital abilities even closer, thanks to D-pad buttons integrated into the thumb rest. The concept behind this design allows you to keep a firm grip with your thumb while rocking up, down, forward and back to actuate the buttons. Map your crucial gear, upgrades, ults, or abilities to any of the D-pad buttons and wipe out the competition with ease. Ensure your arsenal is always within reach but never in the way.

OLED DISPLAY
We've incorporated a customizable 96 x 24 OLED display directly onto the MM830 add more personal flair. Flaunt your colors, rep your clan emblems, or fly your fireteam banners with pride - or even display crucial stats in the thick of battle.

THE DEFINITION OF RUGGED
Set a new standard for durability in gaming mice with top cover and left and right click buttons composed of PBT material for maximum protection against wear and tear, while the buttons are equipped with Omron switches for unparalleled longevity. Even the scroll wheel is buffed, with a Japanese ALPS encoder for maximum accuracy and minimal jamming or stickiness.

A PRECISION SENSOR FOR SCARY ACCURACY
The optical sensor in the MM830 can be tuned with software to track as high as 24,000 DPI. That means no lag, no stutter, and no fighting with your mouse in the thick of it. And in case you need to favor pinpoint precision over speed, the DPI is instantly adjustable, giving you the ability to make real-time adjustments in the fog of war.

ILLUMINATE YOUR VICTORIES

The MM830 is outfitted with customizable 4-zone LED lighting capable of full 16.7 million RGB illumination.

CUSTOMIZABLE DPI SETTINGS

Set your default DPI, and four separate DPI settings in 100 DPI increments, anywhere from 100 DPI up to 12000 DPI. An onboard DPI switch allows you to make on-the-fly adjustments in precision, allowing you to optimize your APM as quickly as you can switch up your macros.
