Features

Power Bass gives your system a big boost
Your Samsung Micro Audio System is designed to deliver a deeper and richer bass sound. The vibrations radiate through the speaker system to ensure all low notes are produced. The powerful sound will take your entertainment to the next level and make you feel as if you were in the theatres. Enjoy powerful sounds with Samsung's Micro Audio Systems.

Make your music into MP3s easily
Enjoy fast and flexible MP3 creation from a range of audio sources. With the built-in EZ MP3 Maker, you can use your audio system to make high-quality MP3 files via CD ripping or recording from FM radio and AUX input. With a suitable cable, you can even connect a turntable and transfer vinyl records into digital media. It's easy to convert your music collection into this convenient modern format.

Lets your portable devices rock your room.
Whether you like to DJ from your MP3 player or old CD player, Samsung's Portable Audio In function lets you connect your audio device of choice so you can enjoy your favourite songs with the full and feature-laden sound of your mini and micro component .The conveniently positioned input on the front panel makes plugging in a breeze.

Don't miss your favourite radio program even when you are away.
Enjoy your favourite radio program once you have Samsung Audio System's Radio Recording Timer feature. By letting your audio start recording at a particular time that you've set and record only for a certain length of time as you like, Samsung Audio System allows you not to miss any single radio program that you like. Be flexible with your schedule, not being restricted by the fixed time of your favorite radio program.

Bluetooth
Bluetooth is the new way of connecting device to device wirelessly. Samsung audio system is equipped with Bluetooth, it can connect with compatible portable devices wirelessly. Listen to music using your portable music player or even cellular phone without connecting wires.

CD Ripping
Take your favourite tracks with you on your MP3 player. In minutes, you can convert your CDs to MP3s with the CD ripping feature. Extract audio tracks from your CDs simply by inserting your CD and pressing the ripping button.
