Genius 535 Navigator Gaming Mouse

Specifications

Overview:

Are you a heavy gamer looking for one high performance and unique gaming mouse? Just for professional gamers, the leading mouse brand ; Genius ; has introduced the Navigator 535, a new powerful and innovative laser gaming mouse. The most revolutionary function of Navigator 535 is its memory button, which can store up to five gaming profiles. Using Agama software, you just set up your mouse once and don;t need to use the driver again. Then, just take Navigator 535 to any computer and the game profiles will follow you. The green LED lights of G1 to G5 will blink one by one while pushing the memory button and you can choose which profile to use.

Navigator 535 provides an incredible 100x more sensitivity to surface detail - or tracking power - than an optical device, and the laser engine provides an astounding 6.4 mega pixels per second (30-pixel by 30-pixel by 7080 frame rate equals 6.4 mega pixels/sec). While you are playing games, you can switch the resolution of Navigator 535 to 2000, 1600 or 800 dpi with the three hot keys (no driver needed). Just press one button on Navigator 535, and you can get the highest speed (7080 frame rate and 1000 report rate) with the smoothest motion in your virtual world - shooting, fighting, flying or racing. When you come back to real life, you can adjust the resolution to 800 dpi to deal with your general paper work.

You can set a macro, continuous click, single click or other functions into the seven mouse buttons including the four side buttons. These programmable buttons give you more fun in gaming. The special Agama design with dazzling colors is ultra attractive and the ergonomic shape is very comfortable for your hand and wrist. Navigator 535 is the most advanced and high-level mouse for gaming and long-term usage. Don;t pass up the Navigator 535 if you want more fun and victories in your games. Check your sales representative how you can pick up this remarkable device.
