MikroTik cAP 2nD - 2.4GHz Indoor Access Points

Product Overview

MikroTik cAP 2nD - 2.4GHz Indoor AP, Access Points, Ceiling / Wall mount, WiFi & Hotspot.

Specifications

Overview:

The cAP is MikroTik's first 2.4GHz ceiling AP. Inconspicuously designed, it blends into the environment, perfect for hospitality businesses, such as hotels, airports, shopping malls etc. The cAP 2n supports 802.11b/g/n and can be powered by PoE. It's a perfect companion for the MikroTik CAPsMAN (controlled AP system manager), allowing you to control all your AP devices from one central location. Unlike traditional controller software, which requires a separate PC/Mac to run; MikroTik's CAPsMAN runs on any existing RouterBOARD device in your network. No need for a separate controller machine. Everything is included to get you started, wall/ceiling mount, PoE injector, power adapter and even the screws and screw anchors.
