

MT-TG-BT5-OUT

MikroTik outdoor Bluetooth Tag for KNOT or other IoT asset-tracking

Product Overview

MikroTik TG-BT5-out outdoor Bluetooth Tag for KNOT or other IoT asset-tracking, 32 kb RAM, 512 kb storage size, 1x DC Input

Specifications

Features:

TG-BT5-OUT

An outdoor heavy-duty Bluetooth tag for the MikroTik KNOT or other IoT asset-tracking/telemetry setups. Built-in temperature sensors and accelerometer. Cast in industrial grade molds for maximum protection.

TG-BT5-OUT : the heavy-duty tag for industrial challenges

This version of our BLE tags comes completely sealed, cast in industrial-grade molds to give it a solid IP69k ingress protection rating. In other words, this tag is dust-tight - nothing gets in, and it is fully protected against close-range high-pressure, high-temperature spray downs. Perfect for industrial telemetry systems or to track all kinds of heavy equipment and materials at a construction site.

Like the indoor version, this tag also supports iBeacon, Eddystone, and MikroTik telemetry formats. There is an NFC encoded MAC address and optional encryption. Unlike the indoor version, the outdoor tag comes with a built-in temperature sensor that can be used for condition monitoring. The +/-0.5 degreesC precision can be very useful in cold supply chain logistics.

TG-BT5-OUT features an improved 550 mAH battery that will last around five years (with a sending interval of 1s). It is suitable for strapping to all kinds of surfaces, and it can handle a temperature range of -20 degreesC to 85 degreesC.
