Samsung 2.0 Mini Component system

Product Overview

Samsung Mini Component system, 220W, 2.0 Channel, Mini CD Component, Giga Sound Bass boost, USB input, CD Ripping, FM radio, Triple Protector.

Specifications

Overview

- Enjoy 220W of crystal clear sound power
- Play your music and movies from your USB directly
- Record music from your favorite CD directly to your USB

Features

Sound guaranteed to move you
Upgrade your sound system with Samsung's Giga Sound Blast. With Giga Sound Blast, you will experience first-hand the superior performance aimed at delivering sound that will bring you to your feet. The enhanced low-frequency bass levels and revamped quick high-frequency levels produce twice the sound volume and quality, making it the perfect party guest.

Experience karaoke night in your living room
With the Samsung Mini Component, you can experience a whole new dimension of fun - there's no need to go out for a karaoke night. Instead, call your friends over and have your own little music night with the My Karaoke and MIC mixing function. The mixing function removes the vocals from your favourite songs and leaves only the background music so that people can sing to it. Even better, record both vocals with the background music on the spot.

Don't miss your favourite radio program even when you are away.
Enjoy your favourite radio program once you have Samsung Audio System's Radio Recording Timer feature. By letting your audio start recording at a particular time that you've set and record only for a certain length of time as you like, Samsung Audio System allows you not to miss any single radio program that you like. Be flexible with your schedule, not being restricted by the fixed time of your favourite radio program.

Transform your living room to a stadium
The Samsung Mini Component System comes with a feature that is sure to make you feel that you're in the midst of a cheering crowd at a football game. The new Caster EQ enhances the clarity of each commentator while the Stadium EQ lets you

experience all the shouts and cheers of the game from your living room. Enjoy the game without the hassle of going there.

Make your music into MP3s easily
Enjoy fast and flexible MP3 creation from a range of audio sources. With the built-in EZ MP3 Maker, you can use your audio system to make high-quality MP3 files via CD ripping or recording from FM radio and AUX input. With a suitable cable, you can even connect a turntable and transfer vinyl records into digital media. It's easy to convert your music collection into this convenient modern format.
