Specifications

Features:

Ultimate Two Handed Power
When you pair a 3Dconnexion SpaceMouse Enterprise with a CadMouse and CadMouse Pad the whole is most definitely greater than the sum of its parts. We call this synergy Two Handed Power - the SpaceMouse Enterprise smoothly positions your object or view, while the CadMouse selects and creates with ease. It's a natural and comfortable work style that can't be matched.

SpaceMouse Enterprise
SpaceMouse Enterprise, 3Dconnexion's most advanced 3D mouse ever, introduces a new level of high-performance features that give you an unprecedented real-time understanding of engineering design. SpaceMouse Enterprise is also the most ergonomically designed product we've ever created. The comprehensive array of large, keyboard like buttons, including a significantly expanded set of QuickView Keys and keyboard modifiers, means less hand travel to and from the keyboard than ever before.

The World's First Mouse for CAD Professionals
Other mice aren't designed with CAD users in mind, but the 3Dconnexion CadMouse was born for it. The 3Dconnexion CadMouse is designed specifically for working in CAD. Say goodbye to repetitive mouse wheel clicking and say hello to precision and comfort thanks to the advanced laser sensor and dedicated middle mouse button. Stay in control with the Smart Scroll wheel and marvel at how you ever worked without QuickZoom that effortlessly zooms to your point of interest with a single click.

The Perfect Blend of Speed and Precision
The 3Dconnexion CadMouse Pad provides the ideal balance between speed and control thanks to its high-quality

micro-textured coating. Tailor made for the 3Dconnexion CadMouse, it enables effortless, precise mouse movement thanks to a perfect equilibrium between static and kinetic friction. That means CadMouse moves exactly how you mean it to-every time.

Flexible Connectivity
We like to think we thought of everything when creating the SpaceMouse Enterprise Kit. Simply connect the SpaceMouse Enterprise and CadMouse to the twin-port USB hub (included as standard) so you only need to use one USB port on your workstation.

The Foundation of your 3Dconnexion Experience
3DxWare 10 provides a convenient single driver solution for the SpaceMouse Enterprise and CadMouse. Its simple yet powerful user interface allows you to customize and optimize each product for peak performance.
