Specifications

Features:

Ambidextrous design

The symmetrical design of the AORUS M4 is designed for both hands. It is comfortable for either hand, due to the perfect weight-balanced design, ergonomic shape and 2 pairs of side buttons.

REAL 6400 DPI OPTICAL SENSOR

AORUS M4 boasts an enthusiast-grade 6400 dpi optical sensor (Pixart 3988), capable of 200 ips and 50G acceleration, that gives you the ultimate accuracy for competitive gaming. Adjustable in 50 dpi increments further allows you to make seamless transition from your old mouse by fine-tuning to the level that precisely fits your play style.

50-MILLION-CLICK OMRON SWITCH

The Japanese Omron switches on both buttons provide the most comfortable experience with crisp, tactile responses at your fingertips. The switches are also engineered to guarantee extended life time of over 50 million clicks.

FEROCIOUS TALONS

The AORUS Core is inspired by the falcon's aggressive nature and hunting prowess. The falcon uses its razor sharp talons to swiftly strike down its prey with exceptional efficiency and precision, qualities that are exemplified in the fine details of AORUS design.

RGB FUSION 2.0

With 16.7M customizable color options and numerous lighting effects, you can choose lighting effects or synchronize with other AORUS devices.

On-the-fly DPI Adjustable

Define the DPI according to your preference and make swift adjustment.

Product Specification Sheet

Fully programmable and saved onboard

Each button on AORUS M4 can be configured via AORUS Engine to meet your commands. The settings are directly saved onboard.

ARM Based Processor

Boasting 32-bit ARM processor, AORUS M4 delivers low-latency performance and amazingly fast processing ability.

Rubber Grips

Anti-slip rubber grips on both side offer you an absolute control of the mouse.
