Specifications

Features:

Gaming Optical Sensor
Play to your full potential by being more accurate than you've ever been before. G102 features a new sensor designed in the USA and manufactured in Switzerland. The 200-6000 DPI sensor delivers incredible accuracy, tracking speed and consistency for better control no matter your style of gameplay. The consistency and accuracy of the sensor means you can start training your muscles to aim by feel, not just sight.

Comfortable and familiar
G102 is inspired by the classic lines and simple construction of the legendary Logitech G100S Gaming Mouse. Beloved by gamers worldwide and a favorite of esports pros, it's a familiar design we have reimagined and optimized from the inside-out for versatility, durability and comfort for everyday use.

Up to 8x faster
G102 Prodigy communicates at up to 1000 reports per second - or 8 times faster than standard mice. This means when the mouse is moved or clicked, the on-screen response is near-instantaneous.

Crisp, consistent clicks
Advanced button tensioning keeps the left and right mouse buttons primed to click, reducing the force needed to click and delivering exceptional click feel, response and consistency.

Legendary Logitech quality
For more than 30 years, Logitech has been leading innovation and advancements in the audio, office and gaming technology spaces. Logitech's high-quality products focus on the experience and help you realize your full potential. Each piece of gaming gear is designed and tested in our state-of-the-art research and development labs, and held to the highest performance standards to bring you the optimal gaming experience.

Chose from up to 16.8 million colors
Choose from a palette of up to 16.8 million colors and different brightness levels to match your style, system or environment. Download Logitech Gaming Software to get access to over 300 game profiles and intelligent illumination that responds to your in-game actions.

Customize for more control
Logitech G102 Prodigy Gaming Mouse can be used directly out-of-the-box, or can be fully configured using Logitech Gaming Software. Advanced users can configure any of the 6 buttons to simplify in-game actions.

200-6000 DPI
On-the-fly DPI shifting lets you switch between up to 5 sensitivity settings (4 default), from a pixel-precise 200 DPI for sniping) to a lightning-fast 6000 DPI.

Take your settings with you
Save your preferences to the onboard memory on the mouse and use it on any PC you take it to with no need to install software or reconfigure your settings on the new PC.

System Requirements:

- Windows® 10, Windows 8.1, Windows 8, Windows 7
- USB port
- Internet connection for optional software download
